PREFACE

STATUTORY BASIS

These regulations constitute the legal basis for control of air pollution sources in Maricopa County, Arizona. They are adopted to implement the policy set forth in Title 49 of the Arizona Revised Statutes and to fulfill the State's responsibilities under the Federal Clean Air Act and its amendments to provide a legally enforceable State Implementation Plan for the attainment and maintenance of the National Ambient Air Quality Standards. **This printing of the Regulations incorporates changes adopted by the Maricopa County Board of Supervisors on April 7, 2004 and April 21, 2004.** The revision date and/or adoption date is noted in the Table of Contents and on the first page of text of each rule.

ORGANIZATIONAL STRUCTURE AND NUMBERING OF RULES

In order to facilitate the use of the Regulations, rules are organized into five sections that are consistent throughout the Regulations. A numbering series designates the same section in each rule as follows:

SECTION 100 - GENERAL
SECTION 200 - DEFINITIONS
SECTION 300 - STANDARDS
SECTION 400 - ADMINISTRATIVE REQUIREMENTS
SECTION 500 - MONITORING AND RECORDS

The contents of each section are presented in an index that precedes each rule. Not all of the five sections are applicable to every rule, so only the relevant sections will be found in some rules. When a category does not pertain to a rule, the section and number series will appear in the index followed by the words "not applicable."

REGULATORY REFORM

The Maricopa County Air Quality Division has an on-going program of regulatory review to evaluate the Regulations for need, effectiveness, enforceability, clarity, simplicity and consistency with other statutory provisions. Users of these Regulations are encouraged to submit any comments or suggestions to:
