

# Preventive Drug List for Maricopa County

Preventive care coverage is an integral part of a comprehensive health care plan that includes preventive drug therapies. Under some plans, you may not be required to pay a copay, coinsurance (the percentage of the cost of your covered medical expenses after you meet your deductible) and/or deductible (the amount you pay before your plan starts to pay) for preventive medications.

Preventive medications are those prescribed to prevent the occurrence of a disease or condition for those individuals with risk factors, or to prevent the recurrence of a disease or condition for those who have recovered, and do not include drugs used to treat an existing illness, injury or condition. Preventive medications are those used for the prevention of conditions such as high blood pressure, high cholesterol, diabetes, asthma, osteoporosis, heart attack and stroke, and prenatal nutrient deficiency.

**Preventive drugs that are generic (listed in lowercase) or preferred brands (listed in *italics*) on the CIGNA Choice Fund HSA plan are free and not subject to the deductible. Preventive non-preferred brand drugs (listed in UPPERCASE) are covered at 50% coinsurance and are not subject to the deductible.**

You can also check the Drug List on [myCIGNA.com](http://myCIGNA.com) for more information and new updates to this list. Preventive medications on the online Drug List are indicated with a "PM" after the drug name. Refer to your plan materials to determine if your plan includes a preventive medication coverage feature.

**Health Care Reform and You.** The Patient Protection and Affordable Care Act (PPACA), commonly referred to as "health care reform," was signed into law on March 23, 2010. This important legislation will result in changes to every American's health coverage. Some of the changes are taking effect in 2010 and most of the law's effects will be felt by 2014.

CIGNA will comply with all provisions of the law including those that impact your pharmacy coverage plan. For example, depending upon the final government regulations, coverage for medications that have not traditionally been included in pharmacy plans, such as specific over-the-counter (OTC) medications, may be made available at no cost share to you. As with all covered medications, we would require a prescription from your doctor to process the claim under your pharmacy plan (including OTC medications).

To get the most current information visit [www.informedonreform.com](http://www.informedonreform.com) or [CIGNA.com](http://CIGNA.com) and look for the "Informed on Reform" link.
