## INSTRUCTIONS

# APPLICATION FOR NON-TITLE V AIR QUALITY PERMIT

Use this form for applying for a non-title V air quality permit for an entire facility. Do not use it for amending prior applications, for adding additional pieces of equipment at existing facilities, etc.

Complete the application by typing or printing legibly. The submitted application and documents become the property of the Maricopa County Environmental Services Department (Department) and will not be returned. All submitted documents will be available to the public unless a notice of confidentiality has been submitted by the applicant in accordance with Arizona Revised Statutes (ARS) §49-487 and accepted by the Department in accordance with Maricopa County Air Pollution Control Regulations, Rules 100 and 200. If confidentiality is claimed pursuant to ARS §49-487, a fully completed application with confidential information clearly identified along with a separate copy of the application for public review without the confidential information and a written justification for the confidentiality claimed must be submitted. For a facility without a valid, Department issued, air quality permit, a \$350.00 application fee must accompany the application. For a permit renewal application, an application fee is not required. The applicant will be billed at a later date for any additional applicable fees. If the application is submitted as a result of receiving a notice of violation (NOV), an additional \$70.00 late fee must accompany the application. Once the permit is issued, the Permittee will be billed an annual administrative fee per Department Rule 280 (Fees). For questions regarding billing, call the Department Business Services Division at (602) 506-6464.

Attach manufacturers' drawings and specifications whenever available. If necessary, attach additional sheets to the application to provide all required information. Please submit the application by completing the attached original forms.

In addition, there is no longer a fee required for submitting an administrative permit amendment, a permit transfer or a performance test protocol.

The Maricopa County Air Pollution Control Regulations are available at the above address or may be viewed and/or downloaded from our web site. You may contact the Department by telephone at (602) 506-6816 or (602) 506-6464, or, for other information and costs, visit our web site at <http://www.maricopa.gov/envsvc/Airqual.asp>.

For assistance in completing the application package small businesses may contact the **Small Business Environmental Assistance Program** at (602) 506-5150 or <http://www.maricopa.gov/sbeap>.

In lieu of a Non-Title V Air Quality Permit, your facility may be eligible for an Authority to Operate (ATO) under a General Permit. Facilities that may be eligible for a General Permit include **dry cleaning facilities, graphic arts printing operations, gasoline dispensing operations, surface coating operations, vehicle and mobile equipment refinishing operations, and external fuel burning equipment that uses gaseous fuels**. To see if your facility qualifies for an Authority to Operate under a General Permit, refer to pages two through four of these instructions. For more information about an ATO under a General Permit, please visit our web site or call Diana Niño at (602) 506-6094.

Do not use this application form for applying for an ATO under a general permit. Also, do not use this application form for applying for a Title V Air Quality Permit. Separate application packages are available for these purposes.

**GASOLINE DISPENSING OPERATIONS:**

Gasoline dispensing operations which meet all of the following criteria are eligible for a General Permit:

- Do not conduct any other activities at the site requiring an air quality permit.
- Do not have an obstruction at the bottom of the fill pipe that prevents the measurement of how far the end of the fill pipe is from the bottom of the tank (overflow protection flappers are OK).
- Each gasoline tank must have its own vapor return line to return the vapors to the tanker truck if Stage I vapor recovery is required.
