MEMO

Recording of Survey and Plat Maps

The Maricopa County Recorder's office is happy to announce that beginning **October 1st 2013** all mylar maps will be scanned, recorded and the original mylar map returned immediately back to the customer. *We will no longer conform copies, however PAPER copies of recorded maps may be purchased immediately after they are recorded.*

*Effective **OCTOBER 1, 2013** these are the **ONLY** options for map recording:*

1. Open a recording account which will allow you to record your map electronically (over 64% already do this) or use the account for payment.
2. Wait for the map to be scanned and take it back (waiting time may be up to 20 minutes, and may take longer if the map has multiple pages).
3. Drop off the map with the payment and pick it up later the same day, or within the next 30 days. Maps left for longer than 30 days will be shredded. (in this case payment can be made using an account, check or cash).
