Maricopa County Department of Public Health INFLUENZA UPDATE

October 4, 2015 through November 7, 2015 Posted November 12, 2015

Individuals with Laboratory Confirmed Influenza

The 2015-2016 influenza season starts on 10/04/2015 (week 40) and continues through 10/01/2016 (week 39). This influenza season (2015-16), there have been **30** laboratory confirmed influenza cases. The State of Arizona has reported **sporadic** activity for **Week 44 (11/07/2015–11/07/2015)**. The chart below shows influenza laboratory test results for each week of the current season (red) and previous seasons.

Table 1 shows the number of laboratory-confirmed cases

Table 1. Laboratory-Confirmed Influenza Cases Compared to Last Week and Last Season, Maricopa County		
Total	Cumulative Season Total	Current Week Total
2015-2016	30	5
2014-2015	2	0
3 season average	5.3	3.3
% increase compared to 2014-2015 season	1400%	N/A
% increase compared to 3 season average	466%	52%
% increase compared to last week	20%	N/A

Types of Influenza

This influenza season **30** confirmed cases of influenza have been reported. **Table 2** shows the number and percentage of cases reported by influenza type and subtype.

Table 2. Types/Subtypes of Influenza by Test, 2015-2016 Season, Maricopa County		
Total	30	100.0%
Type A	26	86.7%
<i>Subtype 2009 H1N1</i>	0	0.0%
<i>Subtype H3</i>	10	38.5%
<i>Subtyping not performed or unknown</i>	16	61.5%
Type B	4	13.3%
Type Unknown	0	0.0%

Pneumonia and Influenza (P&I) Deaths

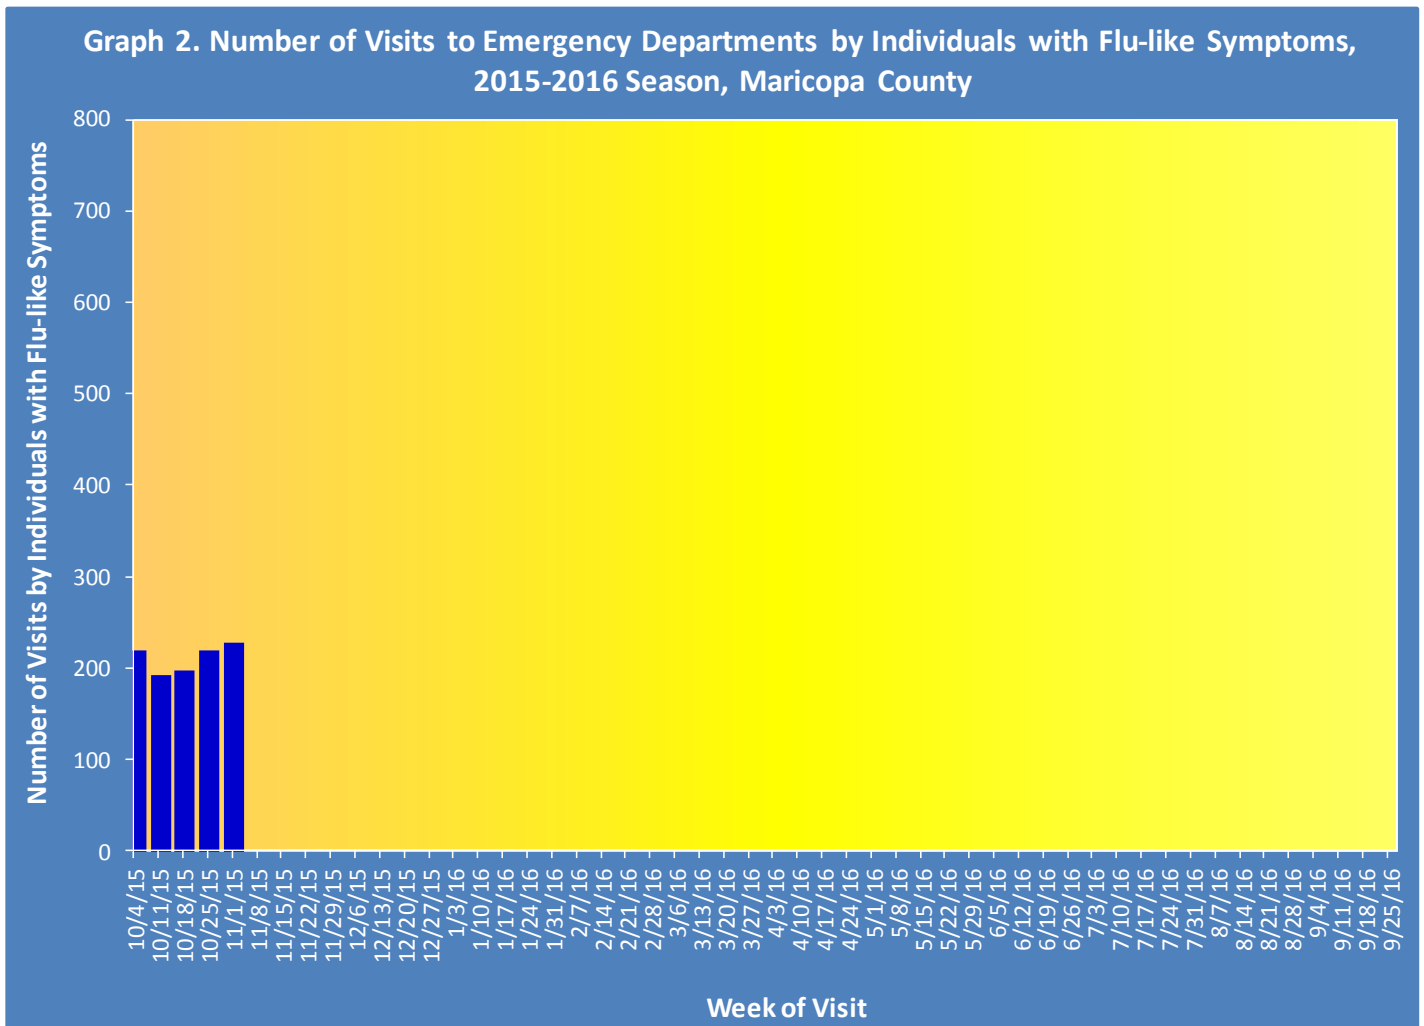

This influenza season there have been **96** pneumonia and influenza (P&I) deaths. No adult influenza related mortality has been reported this season, no pediatric mortality has been reported in Maricopa County this season. **Table 3** shows the number of P&I deaths and the number of influenza deaths that occurred this season and last season.

Table 3. Pneumonia and Influenza (P&I) Deaths, 2015-16 & 2014-15 Seasons, Maricopa County				
	Current Season (2015-2016) As of [11/07/2015]		Last Season (2014-2015) As of [11/01/2014]	
	Pneumonia and Influenza	Influenza	Pneumonia and Influenza	Influenza
Pediatric (Under Age 18)	0	0	2	0
Adult (18 and Over)	96	0	95	0

Influenza Like Illness Activity at Hospital Emergency Departments

This influenza season there have been **1002** visits to emergency departments by individuals with flu-like symptoms. To be counted as an individual with flu-like symptoms, the patient must have both fever and cough/sore throat.

Graph 2 shows the number of patients with flu-like symptoms seen at 12 emergency departments.

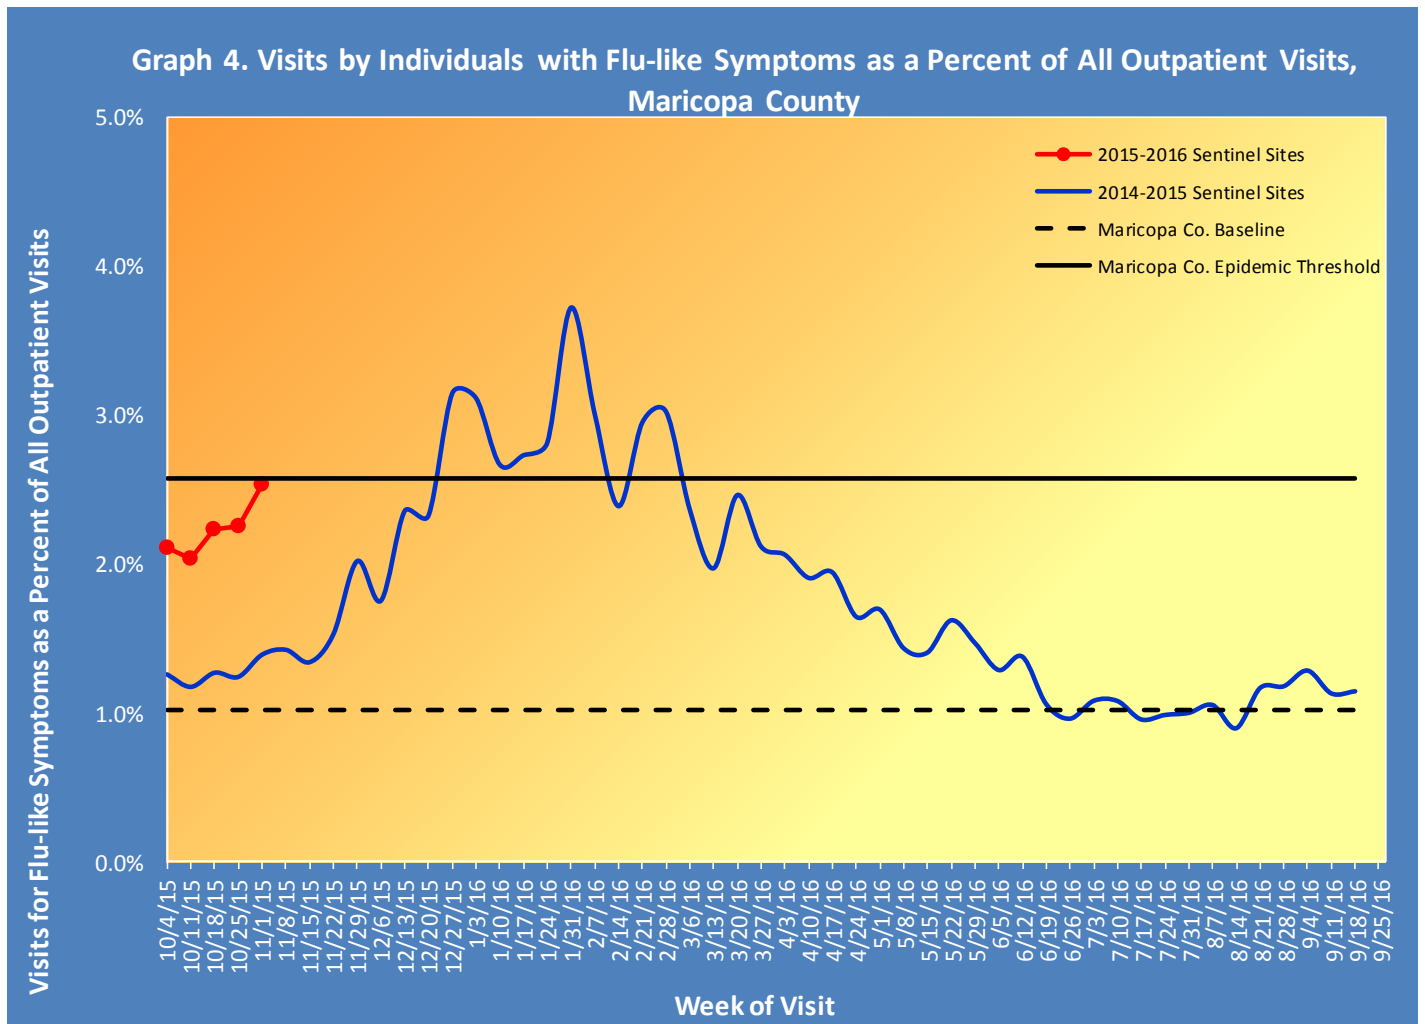

Graph 3 shows what percent of all emergency department visits were individuals with flu-like symptoms (fever and cough/sore throat). The graph shows the trend week by week, with the current season in red.

Influenza-Like Illness Activity at Sentinel Site Outpatient Facilities Reported to the Centers for Disease Control and Prevention (CDC)

Maricopa County sentinel sites (outpatient facilities) report visits due to flu-like symptoms and the total number of visits seen each week to the Centers for Disease Control and Prevention (CDC). This week, 1.98% of visits at outpatient facilities were due to flu-like symptoms.

*Note: Counts are preliminary and may increase as additional data are received. (13 out of 26 reported)

Absentee Activity at Schools

Graph 5 shows the percent of students reported absent and illustrates the week by week trend, for the current school year.

Most schools reported being on Fall Break for Week 41

***The Maricopa County Department of Public Health wishes to thank all of the
