Heat Associated Deaths in Maricopa County

**Counts are preliminary and may increase as additional data are received.*

Heat Caused (HC): Cases that mention heat or heat exposure in Part I of the death certificate causes of death (diseases or conditions in the direct sequence causing death), for variables cod_a, cod_b, cod_c, or cod_d. County of death: Maricopa.

Heat Related (HR): Cases that mention heat exposure in Part II of the death certificate causes of death (diseases and conditions contributing but not directly resulting in the death sequence), but not in any of the Part I variables (cod_a, cod_b, cod_c, or cod_d). County of death: Maricopa.

Under Investigation (UI): Cases the Maricopa County Office of Medical Examiner suspects are heat associated deaths.

Data Sources: Maricopa County, Office of Vital Registration and Office of Medical Examiner; Arizona Department of Health Services, Office of Vital Registration

Heat Associated Hospital Visits in Maricopa County

The figures and tables summarize the percentage of emergency department and inpatient hospital visits for individuals experiencing heat-related illnesses (HRI) according to the BioSense data from 15 Maricopa County emergency department and inpatient hospitals. This data includes both Maricopa residents and non-residents. Prior to May 2019, 13 Maricopa County hospitals reported to BioSense. Included are daily maximum and minimum temperatures as well as selected demographics. The BioSense Platform ESSENCE tool locates heat-related illness visits by identifying key terms and codes within the chief complaint field (i.e., the patient's stated reason for visit), admission reason field (i.e., the provider's noted reason for admission), and discharge diagnosis code field (i.e., ICD-9-CM and ICD-10-CM codes). Data presented are preliminary and may have slight variations each week.
