GENERAL PERMIT TO OPERATE AND/OR CONSTRUCT
As required by Title 49, Chapter 3, Article 2, Section 49-480, Arizona Revised Statutes and Maricopa County Air Pollution Control Regulations

for

FACILITIES OPERATING STATIONARY EMERGENCY INTERNAL COMBUSTION ENGINES

This air quality permit to operate and/or construct does not relieve the applicant of the responsibility of meeting all air pollution regulations.

THE PERMITTEE IS SUBJECT TO THE SPECIFIC AND GENERAL CONDITIONS IDENTIFIED IN THIS PERMIT.

ISSUANCE DATE: 04/10/2021

EXPIRATION DATE: 04/10/2026

Philip McNeely, Director, Maricopa County Air Quality Department

Any cited regulatory paragraphs or section numbers refer to the version of the rules and regulations that were in effect on the first date of public notice of the applicable Permit Condition unless specified otherwise. However, in the event the rules and regulations are amended during the term of this Permit, the amended rules and regulations shall apply to this Permit. Whenever the term, Control Officer, is used in this Permit it shall be interpreted to mean, Control Officer or designated representative. Where the term “Rule” appears, it shall be construed to mean “Maricopa County Air Pollution Control Regulations” unless otherwise noted.

SPECIFIC CONDITIONS

FACILITY-WIDE REQUIREMENTS

1. Permit Eligibility Limitations:
Potential facility-wide emissions of NO\textsubscript{X} from fuel burning equipment and stationary engines shall not exceed 20.0 tons per year. To demonstrate compliance with this requirement, the Permittee shall comply with either of the following options:

a. Option 1:
   i. The total combined heat input rating of all fuel burning equipment (excluding emergency engines) shall not exceed 6.0 million Btu/hr (MMBtu/hr); and
   ii. The total combined rating of all stationary emergency engines shall not exceed 2,000 brake horsepower (BHP).

b. Option 2:
   i. The total combined heat input rating of all fuel burning equipment (excluding emergency engines) shall not exceed 10.0 MMBtu/hr; and
   ii. The maximum rating of any stationary emergency engine at the site shall not exceed 3,000 bhp.
   iii. The Permittee shall demonstrate that potential combined NO\textsubscript{X} emissions from stationary emergency engines operating 500 hours each per year and from all fuel burning equipment operating 8,760 hours per year do not exceed 20.0 tons per year.

[SIP Rule 220 §302.2][SIP Rule 241 §302]

FUEL BURNING EQUIPMENT

External fuel burning equipment includes but is not limited to boilers, furnaces, space heaters, water heaters, pool and spa heaters, kilns, ovens, burners, stoves, steam cleaners, and hot water pressure washers.

2. Operational Limitations:
   a. The Permittee may only use natural gas, butane or propane as fuel for fuel burning equipment.
   b. The maximum heat input rating of any single fuel burning unit shall be less than 10.0 MMBtu/hr.

[SIP Rule 220 §302.2][SIP Rule 241 §302]

3. Recordkeeping:
The Permittee shall maintain the following records for a period of at least five years from the date of the records and make them available to the Control Officer upon request:
   a. Fuel type used for the fuel burning equipment.
   b. Individual and total combined heat input rating of all fuel burning equipment.
   c. Total potential annual NO\textsubscript{X} emission from the facility and corresponding calculations if the Permittee is complying with Option 2 of Permit Condition 1.

[SIP Rule 220 §302.7]

STATIONARY EMERGENCY ENGINES

4. Operational Limitations:
   a. The Permittee shall limit the operation of the emergency engines to no more than 100 hours each per
b. The Permittee shall limit the total hours of operation of the emergency engines to no more than 500 hours each per any twelve consecutive months including the hours listed in Subsection [a] above.

[Rule 324 §206.2] [SIP Rule 324 §205]

c. The emergency engines shall not be used for peak shaving. The emergency engines shall only be used for the following purposes:

i. For power when normal power service fails from the serving utility or if onsite electrical transmission or onsite power generation equipment fails;

ii. Reliability-related activities such as engine readiness, calibration, or maintenance or to prevent the occurrence of an unsafe condition during electrical system maintenance as long as the total number of hours of the operation for these purposes does not exceed 100 hours per calendar year per engine as evidenced by an installed non-resetting hour meter;

iii. Emergency pumping of water resulting from a flood, fire, lightning strikes, police action or for any other essential public services which affect the public health and safety;

iv. Lighting airport runways;

v. Sewage overflow mitigation and/or prevention;

vi. Used as the non-emergency engine when the non-emergency engine has failed, but only for such time as is needed to repair the non-emergency engine. For the purposes of this exemption, if the non-emergency engine is not repaired and returned to service within 12 months, or if the emergency engine is used as the non-emergency engine for more than 50 hours, whichever occurs first, the emergency engine shall be reclassified as a non-emergency engine and shall no longer be eligible for this General Permit.

vii. To operate standby emergency water pumps for fire control that activate when sensors detect low water pressure.

[Rule 324 §104] [SIP Rule 324 §104] [40 CFR §§60.4211(f), 60.4243(d), 63.6640(f)(1) - (2)]

5. Fuel Limitations:

a. The Permittee shall only operate compression ignition (CI) engines using diesel fuel (i.e. fuel oil):

i. The Permittee shall not use any diesel fuel that contains more than 0.0015% sulfur by weight, alone or in combination with other fuels.

[Rule 324 §301.1] [SIP Rule 324 §301.1] [40 CFR §§60.4207(b), 80.510(b)]

ii. For engines subject to NSPS Subpart IIII, as specified in Permit Condition 11.a, the Permittee shall only use diesel fuel that has a minimum cetane index of 40 or a maximum aromatic content of 35 volume percent.

[40 CFR §§60.4207(b), 80.510(b)]

b. The Permittee shall only operate spark ignition (SI) engines using gasoline, natural gas or liquefied petroleum gas (LPG):

i. The Permittee shall not use any gasoline that contains more than 80 ppm sulfur as a per-gallon cap.

[Rule 324 §301.3] [40 CFR §60.4235]

ii. The Permittee shall not use any natural gas or liquefied petroleum gas (LPG) that contains more than 0.05% sulfur by weight, alone or in combination with other fuels.

[Rule 324 §301]

c. The Permittee may operate a natural gas fired engine using propane for a maximum of 100 hours per year as an alternative fuel solely during emergency operations but must keep records of such use.

[40 CFR §60.4243(e)]
6. Maintenance Requirements:
The Permittee shall comply with one of the following for each stationary engine:

a. Maintain the engine in accordance with the manufacturer's written instructions;

b. Maintain the engine in accordance with the maintenance schedule provided by the manufacturer’s authorized service provider; or

c. Conduct preventative maintenance according to the following schedule, including all of the following tuning procedures, if the engine is so equipped, and if such procedures are appropriate to the type of engine:
   i. The following maintenance procedures shall be completed no less frequently than every 300 hours of operation or at least once every 12 months, whichever comes first:
      1) Clean the inlet air filter (if so equipped);
      2) Change the oil filter; and
      3) Change the lubricating oil or conduct an oil analysis to determine Total Base Number, viscosity, and percent water content. The lubricating oil must be replaced within 2 business days after the analytical results are received if any of the following condemning limits are exceeded:
         a) Total Base Number is less than 30% of the Total Base Number of the oil when new;
         b) Viscosity of the oil has changed by more than 20 percent from the viscosity of the oil when new; or
         c) Percent water content (by volume) is greater than 0.5.
   ii. The following maintenance procedures shall be completed at least once every 12 months:
      1) Check the inlet air filter and replace as necessary;
      2) Check all fuel filters and clean as necessary (except cartridge type fuel filters);
      3) Check cartridge type fuel filters and replace as necessary;
      4) Check and adjust the intake and exhaust valves;
      5) Check spark plugs and ignition points and replace as necessary (if so equipped);
      6) Check and adjust the spark timing and dwell or fuel injection timing (if adjustable);
      7) Check and adjust the carburetor mixture (if adjustable);
      8) Check coolant and change as necessary (if so equipped); and
      9) Check the exhaust system and repair all leaks and/or restrictions.

7. Monitoring:

a. The Permittee shall install and operate a non-resetting totalizing hour meter.

b. If the non-resetting totalizing hour meter is found to be malfunctioning, the Permittee shall:
   i. Record hours of operation daily until the function of the hour meter is restored; and
   ii. Restore the function of the hour meter within two weeks. If it is not possible to restore the function of the hour meter within two weeks, the Permittee shall notify the Control Officer in writing and provide a schedule for restoration of the function of the hour meter.

8. Opacity:

a. The Permittee shall not discharge into the ambient air from any single source of emissions any air
contaminant, other than uncombined water, in excess of 20% opacity, except as specified in Permit Condition 11.d.

b. Compliance with visible emissions shall be determined using the techniques specified in EPA Reference Method 9, 40 CFR Part 60, Appendix A.

[Rule 324 §§303, 503.8] [SIP Rule 324 §§303, 503.8]

9. New Source Performance Standards:

a. If the Permittee modifies or reconstructs a stationary compression ignition internal combustion engine after July 11, 2005, that engine shall comply with all applicable requirements of 40 CFR 60 Subpart IIII.

[40 CFR §60.4200(a)(3)]

b. If the Permittee modifies or reconstructs a stationary spark ignition (SI) internal combustion engine after June 12, 2006, that engine shall comply with all applicable requirements of 40 CFR 60 Subpart JJJJ.

[40 CFR §60.4230(a)(5)]

10. 40 CFR 63, Subpart ZZZZ Operating Requirements:

a. Applicability: Engines ordered by the original owner prior to June 12, 2006 are subject to 40 CFR 63 Subpart ZZZZ - National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines (RICE), except for the following:

i. Residential, commercial, and institutional emergency RICE.

ii. Emergency RICE subject to 40 CFR, Subpart IIII.

iii. Emergency RICE subject to 40 CFR, Subpart JJJJ

iv. Stationary RICE that is tested at a stationary test cell/stand.

v. Stationary RICE that is used for national security purposes.

[40 CFR §§63.6585; 63.6590]

b. The Permittee shall operate and maintain each engine and associated air pollution control equipment and monitoring equipment in a manner consistent with safety and good air pollution control practices for minimizing emissions. Determination of whether such operation and maintenance procedures are being used will be based on information available to the Control Officer which may include, but is not limited to, monitoring results, review of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source.

[40 CFR §63.6625(e); Table 6 (9)]

c. The Permittee shall operate and maintain each engine according to the manufacturer's emission-related operation and maintenance instructions or develop and follow the Permittee's own maintenance plan which must provide to the extent practicable for the operation and maintenance of the engine in a manner consistent with good air pollution control practice for minimizing emissions.

[40 CFR §63.6640(a)]

d. The Permittee shall comply with the following maintenance schedule for each engine. For engines maintained in accordance with the schedule in Permit Condition 6.c, the Permittee shall comply with the most stringent maintenance requirements and frequency:

i. Change oil and filter or perform an Oil Analysis Program every 500 hours of operation or annually, whichever comes first. The analysis program must at a minimum analyze the following three parameters: Total Base Number, viscosity and percent water content. The condemning limits for these parameters are as follows:

1) Total Base Number is less than 30 percent of the Total Base Number of the oil when new;

2) Viscosity of the oil has changed by more than 20 percent from the viscosity of the oil when new;

3) Percent water content (by volume) is greater than 0.5.
If none of these limits are exceeded, the Permittee is not required to change the oil. If any of the limits are exceeded, the Permittee must change the oil before continuing to use the engine. The Permittee must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine.

ii. Inspect air cleaner every 1,000 hours of operation or annually, whichever comes first, and replace as necessary;

iii. Inspect spark plugs every 1,000 hours of operation or annually, whichever comes first, and replace as necessary;

iv. Inspect all hoses and belts every 500 hours of operation or annually, whichever comes first, and replace as necessary.

[40 CFR §63.6603(a); Table 2d(4)]

e. If an engine is operating during an emergency and it is not possible to shut down the engine in order to perform the maintenance requirements on the schedule required by this Permit Condition, or if performing the maintenance operations on the required schedule would otherwise pose an unacceptable risk under Federal, State, or local law, the maintenance operations can be delayed until the emergency is over or the unacceptable risk under Federal, State, or local law has abated. The maintenance operations shall be performed as soon as practicable after the emergency has ended or the unacceptable risk under Federal, State, or local law has abated. Sources must report any failure to perform the maintenance operations on the schedule required and the Federal, State or local law under which the risk was deemed unacceptable, in accordance with Permit Condition 14.

[40 CFR §63.6603(a); Table 2d]

f. During periods of startup, the Permittee shall minimize the engine’s time spent at idle during startup and minimize the engine’s startup time to a period needed for appropriate and safe loading of the engine, not to exceed 30 minutes.

[40 CFR §63.6625(h)]

11. NSPS Subpart IIII Requirements:

a. Applicability: The following engines are subject to NSPS Subpart IIII - Standards of Performance for Stationary Compression Ignition (CI) Internal Combustion Engines (ICE):

i. Any stationary CI ICE that is not a fire pump engine that was ordered after July 11, 2005 and manufactured after April 1, 2006.

iii. Any stationary emergency CI ICE that was modified or reconstructed after July 11, 2005.

[40 CFR §60.4200(a)]

b. Emission Standards: Stationary ICE shall comply with the EPA emission standards in Table 1 or Table 2, as applicable, for the same maximum engine power category and model year:

</table>

¹ These ratings are more stringent than required for fire pump engines since they include CO standards. They can still be used by the Permittee to verify compliance with the emission standards.
2 The emission standards for these specified model year ranges only apply to engines in the specified maximum engine power category that have a rated speed greater than 2,650 rpm. [40 CFR §60.4205]

c. Compliance Demonstration:
i. Pre-2007 model year engines, excluding fire pump engines: The Permittee shall demonstrate compliance with the emission standards specified in Table 1 by one of the following:
   - Purchasing an engine certified to the applicable emission standards for the same maximum engine power. The engine must be installed and configured according to the manufacturer's specifications.
   - Keeping records of performance test results for each pollutant for a test conducted on a similar engine. The test must have been conducted using the same methods specified in 40 CFR §60.4212 and these methods must have been followed correctly.
   - Keeping records of data from the engine manufacturer or control device vendor indicating compliance with the standards.
   - Conducting an initial performance test to demonstrate compliance with the emission standards according to the requirements specified in 40 CFR §60.4212, as applicable.

ii. 2007 model year and later engines, excluding fire pump engines: Engines shall be certified by the manufacturer to meet the standards specified in Table 1 for the same maximum engine power category and corresponding model year.

iii. For fire pump engines manufactured the dates in Table 3: the Permittee shall demonstrate compliance with the emission standards specified in Table 2 by one of the methods listed in Subsection [i] of this Permit Condition.

iv. Fire pump engines manufactured after the dates specified in Table 3: Engines shall be certified by the manufacturer to meet the standards specified in Table 2 for the same maximum engine power category and corresponding model year. [40 CFR §60.4211]

d. Additional Opacity Standard:
For 2007 model year and later engines, the Permittee shall not allow exhaust opacity to exceed 15% during the lugging mode. This restriction does not apply to fire pump engines. [40 CFR §§60.4205, 60.4202, 89.113(a)(2)]

e. Crankcase Emissions:
For 2007 model year and later engines, the Permittee shall not discharge crankcase emissions into the ambient atmosphere, unless such crankcase emissions are permanently routed into the exhaust and included in all exhaust emission measurements. This provision does not apply to engines using turbochargers, pumps, blowers, or superchargers for air induction or fire pump engines. [40 CFR §§60.4205, 89.112(e)]

f. The Permittee shall operate and maintain each engine according to the manufacturer’s written instructions, or procedures developed by the Permittee that are approved by the engine manufacturer, over the entire life of the engine. [40 CFR §§60.4211(a), 60.4206]

g. The Permittee shall only change those engine settings that are permitted by the manufacturer.
h. The Permittee shall meet the requirements of 40 CFR Part 89 as it applies.

12. NSPS Subpart JJJJ Requirements:
   
a. Applicability: The following engines listed below are subject to NSPS subpart JJJJ - Standards of Performance for Stationary Spark Ignition (SI) Internal Combustion Engines:
   
i. Any emergency stationary SI ICE that was ordered after June 12, 2006 and manufactured after January 1, 2009.
   
ii. Any emergency stationary SI ICE that was modified or reconstructed after June 12, 2006.

b. Emission Standards: Stationary SI ICE shall be certified by the engine manufacturer to meet the following emission standards:

i. Stationary SI ICE with a maximum engine power less than or equal to 25 HP manufactured on or after July 1, 2008 or that have been modified or reconstructed after June 12, 2006 shall be certified to meet the emission standards and related requirements for nonhandheld engines in Table 4. Engines with a date of manufacture prior to 7/1/08 must comply with the emission standards specified in Table 4 applicable to engines manufactured on 7/1/08.

ii. Gasoline and rich burn LPG engines with a maximum engine power greater than 25 HP manufactured after January 1, 2009 or that have been modified or reconstructed after June 12, 2006 shall be certified to meet the emission standards and related requirements in Table 5. Engines with a date of manufacture prior to 1/1/09 must comply with the emission standards specified in Table 5 applicable to engines manufactured on 1/1/09.

iii. SI ICE with a maximum engine power greater than 25 HP, excluding gasoline and rich burn LPG engines, shall be certified to meet the emission standards in Table 6. For engines with a maximum engine power greater than 100 HP manufactured prior to 1/1/2011, that were certified to the...
standards in 40 CFR Part 1048 applicable to engines that are not severe duty engines, if such engine was certified to a CO standard above the standard in Table 6, the Permittee may meet the CO certification standard for which the engine was certified.

[40 CFR §60.4233(d) - (e)]

iv. Natural gas and lean burn LPG engines with a maximum engine power:

1) Greater than 25 HP but less than 130 HP that were manufactured prior to 1/1/2009 and modified or reconstructed after 6/12/06 shall comply with the emission standards in Table 6;

2) Equal to or greater than 130 HP that were manufactured prior to 1/1/2009 and modified or reconstructed after 6/12/06 shall comply with the emission standards in Table 7.

[40 CFR §60.4233(f)(4)]

c. The Permittee shall operate and maintain the engines according to the manufacturer’s emission-related written instructions

[40 CFR §60.4243]
d. The Permittee shall meet the requirements as specified in 40 CFR Part 1068, Subparts A through D, as they apply.

[40 CFR §60.4243]

13. Recordkeeping:

a. The Permittee shall maintain the following records for a period of at least five years from the date of the records and make them available to the Control Officer upon request:

i. Stationary Engine List: Maintain a list of stationary engines that includes all of the following information for each engine: combustion type (compression-ignition, or lean-burn spark-ignition, or rich-burn spark-ignition); manufacturer; model designation, rated bhp, serial number, and the location of each engine at the facility. If the equipment list associated with the current permit includes all of the required information for each stationary engine located at the facility, this requirement may be fulfilled by keeping a complete copy of the current permit, including the equipment list, in a readily accessible location at the facility where the engines are located, and by providing the equipment list to the Control Officer upon request.
ii. Operation Records: The Permittee shall maintain records of the monthly and 12-month rolling total hours of operation for each stationary engine, including:

1) Monthly and annual hours of operation for reliability related activities such as engine readiness, calibration, or maintenance, or to prevent the occurrence of an unsafe condition during electrical system maintenance; and

2) The number of operating hours for emergency use and an explanation for the emergency use.  

iii. Fuel Records:

1) Maintain records of the type and amount of fuel purchased for use in the stationary engines (e.g. receipts, pipeline tickets, or bills of lading); and

2) Maintain records of the fuel type and sulfur content of any fuel that is used in the stationary engines, excluding gasoline. For gasoline, maintain records that the fuel was purchased in the United States. The Permittee shall maintain fuel receipts, contract specifications, pipeline meter tickets, fuel supplier information or purchase records or test results of the fuel for sulfur content.

iv. Maintenance Records:

1) The Permittee shall maintain records of all stationary engine maintenance, including the date when maintenance was performed and the maintenance procedures that were performed.

2) The Permittee shall maintain records of oil analysis results if those results are used in lieu of an oil change.

v. Manufacturer's Operation and Maintenance Instructions: The Permittee shall keep the manufacturer's written instructions for operation and maintenance of the engine available at the facility where the engine is located at all times. If the manufacturer's written instructions are not available, the Permittee shall keep a preventative maintenance plan, indicating which procedures in Permit Condition 6 are appropriate to the engine, available at the facility where the engine is located at all times.

14. Reporting Requirements:

Deviations from ICE Maintenance Schedule for Engine Subject to 40 CFR 63 Subpart ZZZZ: The Permittee shall report any failure to perform a maintenance operation on the schedule required by Permit Condition 10 and the Federal, State or local law under which the risk was deemed unacceptable. The Report shall be submitted to the Control Officer, Attn: Compliance Division Manager, within 2 working days after the date on which the maintenance operation was required to be performed. A subsequent report shall be submitted to the Control Officer within 2 working days after the required maintenance operation is performed.

15. Emergency Provisions:

The Permittee shall comply with all recordkeeping and reporting requirements of Rule 130 (Emergency Provisions) and Rule 140 (Excess Emissions) if the allowable hours of operation are exceeded.
ODORS AND GASEOUS AIR CONTAMINANTS

16. Air Pollution Prohibited:
No person shall discharge from any source whatever into the atmosphere regulated air pollutants which exceed in quantity or concentration that specified and allowed in these rules, the Arizona Administrative Code [AAC] or Arizona Revised Statures [ARS], or which cause damage to property, or unreasonably interfere with the comfortable enjoyment of life or property of a substantial part of a community, or obscure visibility, or which in any way degrade the quality of the ambient air below the standards established by the Board Of Supervisors or the Director.

a. Limitation - Hydrogen Sulfide (H\textsubscript{2}S): No person shall emit H\textsubscript{2}S from any location in such a manner or amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 0.03 parts per million by volume (ppmv) for any averaging period of 30 minutes or more.

b. Reasonable Stack Height Required: Where a stack, vent or other outlet is at such a level that air contaminants are discharged to adjoining property, the Control Officer may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet to a degree that will adequately dilute, reduce or eliminate the discharge of air contaminants to adjoining property.

17. Compliance Demonstration:
   a. The Permittee shall perform a compliance demonstration by conducting a test to monitor H\textsubscript{2}S levels within 90 days of any of the reception of a written request from the Control Officer.
   b. The compliance demonstration shall be performed using a handheld air analyzer with a suitable range (3.0 ppb – 10.0 ppm H\textsubscript{2}S).
   c. The compliance demonstration shall be performed at a location representing the nearest occupied place beyond the premises on which the source of H\textsubscript{2}S is located.
   d. The Permittee shall submit a report within 30 days of completion of each demonstration to the Control Officer, Attn: Compliance Division Manager that details the results of each compliance demonstration.

18. Compliance Plan:
In the event of an exceedance of the H\textsubscript{2}S limitation, the Permittee shall submit a Compliance Plan to the Control Officer, Attn: Compliance Manager, for approval. The Compliance Plan shall include:
   a. Technological evaluation of additional odor control alternatives at the plant.
   b. Additional monitoring and/or air dispersion modeling to determine property line concentration of H\textsubscript{2}S based on the implementation of selected odor control alternatives.
   c. Conceptual design and preliminary cost estimate for the proposed odor control alternatives.
   d. Schedule for design and construction of the proposed control alternatives.
   e. Description of recommended actions.

The Permittee shall complete and submit the Compliance Plan within 120 days of exceeding the H\textsubscript{2}S emission limitation.

19. Recordkeeping:
The Permittee shall keep the following records on site and available upon request. The records shall be retained for 5 years.
a. The Permittee shall maintain records of any process upsets that would cause the release of H₂S or other waste gases into the atmosphere. Examples of such upsets would include failure of the blowers in the recirculation of gases in the aeration process or a catastrophic failure of the biological reactor responsible for H₂S removal.

b. The Permittee shall retain all records pertaining to the repairs and schedules required to restore the treatment process after upset. The Permittee shall retain records of the operational parameter tests used to ensure proper operation of the process.

[SIP Rule 220 §§302.7, 500] [SIP Rule 100 §504]

RULE 310: FUGITIVE DUST FROM DUST-GENERATING OPERATIONS

20. Applicability:

a. The provisions of this Permit Section apply to all dust-generating operations except for those dust-generating operations listed in Permit Condition 21. Any person engaged in a dust-generating operation subject to this Permit Section shall be subject to the standards and/or requirements of this Permit Section before, after, and while conducting such dust-generating operation, including during weekends, after work hours, and on holidays.

b. For the purpose of Rule 310, any control measure that is implemented must achieve the applicable standard(s) described in Rule 310, as determined by the corresponding test method(s), as applicable, and must achieve other applicable standard(s) set forth in Rule 310.

c. Regardless of whether a dust-generating operation is in compliance with an approved Dust Control Plan or there is no approved Dust Control Plan, the owner and/or operator of a dust-generating operation shall be subject to all requirements of Rule 310 at all times.

d. Failure to comply with the provisions of these requirements, as applicable, and/or of an approved Dust Control Plan, shall constitute a violation.

[SIP Rule 310 §§102, 301]

21. Exemptions:

The provisions of this Permit Section shall not apply to the following activities:

a. Normal farm cultural practices according to Arizona Revised Statutes (A.R.S.) §49-457 and A.R.S. §49-504.4.

b. Emergency activities that may disturb the soil conducted by any utility or government agency in order to prevent public injury or to restore critical utilities to functional status.

c. Establishing of initial landscapes without the use of mechanized equipment or conducting landscape maintenance without the use of mechanized equipment. However, establishing initial landscapes without the use of mechanized equipment and conducting landscape maintenance without the use of mechanized equipment shall not include grading or trenching performed to establish initial landscapes or to redesign existing landscapes.

d. Playing on or maintaining a field used for non-motorized sports.

e. Rooftop operations for cutting, drilling, grinding, or coring roofing tile when such activity is occurring on a pitched roof.

[SIP Rule 310 §103]

22. Dust Control Plan Requirement:

a. The owner and/or operator of a dust-generating operation shall submit to the Control Officer a Dust Control Plan with any permit applications that involve dust-generating operations with a disturbed surface area that equals or exceeds 0.10 acre (4,356 square feet) before commencing any routine dust-generating operation. The Dust Control Plan shall be kept available onsite at all times.

b. The Permittee shall comply with the requirements of the Dust Control Plan and the provisions of MCAQD Rule 310 Sections 301 – 310 at all times.
23. Visible Emission Requirements for Dust-Generating Operations:
   a. The Permittee shall not cause or allow visible fugitive dust emissions to exceed 20% opacity.
   b. The Permittee shall not cause or allow visible emissions of particulate matter, including fugitive dust, beyond the property line within which the emissions are generated. Visible emissions shall be determined by a standard of no visible emissions exceeding 30 seconds in duration in any six-minute period as determined by using EPA Reference Method 22. This requirement does not apply to dust-generating operations conducted within 25 feet of the property line.  
      [SIP Rule 310 §§ 301-310, 409]

24. Exemptions from Dust-Generating Operation Opacity Limitation Requirement:
   a. If wind conditions cause fugitive dust emissions to exceed the opacity requirements in this permit, despite implementation of the Dust Control Plan, an owner and/or operator shall:
      i. Ensure that all control measures and requirements of the Dust Control Plan are implemented, and the subject violations cannot be prevented by better application, operation, or maintenance of these measures and requirements.
      ii. Cease dust-generating operations and stabilize any disturbed surface area consistent with the Stabilization Requirements of this Permit Section.
      iii. Compile records consistent with the Record keeping requirements in this Permit Section and document the control measure and other Dust Control Plan requirements implemented.
   b. Emergency Maintenance of Flood Control Channels and Water Retention Basins: The opacity limit shall not apply to emergency maintenance of flood control channels and water retention basins, provided that control measures are implemented.  
      [SIP Rule 310 §303.1]

25. Stabilization Requirements for Dust-Generating Operations:
   a. Unpaved Parking Lot: The owner and/or operator of any unpaved parking lot shall not allow visible fugitive dust emissions to exceed 20% opacity and shall not allow silt loading equal to or greater than 0.33 oz/ft². However, if silt loading is equal to or greater than 0.33 oz/ft², then the owner and/or operator shall not allow the silt content to exceed 8%.  
      [SIP Rule 310 §§232, 304.1]
   b. Disturbed Surface Area: The owner and/or operator of any disturbed surface area on which no activity is occurring shall meet at least one of the standards described in MCAQD Rule 310 Section 304.  
      [SIP Rule 310 §304]

26. Control Measures for Dust-Generating Operations:
   For dust-generating operations with a disturbed surface area less than 0.10 acre (4,356 square feet), the owner and/or operator shall install, maintain, and use control measures, as applicable. Control measures for specific dust-generating operations are described in MCAQD Rule 310 Section 305. The owner and/or operator of a dust-generating operation shall implement control measures before, after, and while conducting dust-generating operations, including during weekends, after work hours, and on holidays.  
      [SIP Rule 310 §305]

27. Trackout, Carry-Out, Spillage, and/or Erosion:
   The owner and/or operator of a dust-generating operation shall prevent and control trackout, carry-out, spillage, and/or erosion in accordance with MCAQD Rule 310 Section 306  
      [SIP Rule 310 §306.2]

28. Dust Control Plan Revisions:
   For dust-generating operations with a disturbed surface area equal to or greater than 0.10 acre (4,356 square feet):
a. If the Control Officer determines that an approved Dust Control Plan has been followed, yet fugitive dust emissions from any dust-generating operation still exceed the standards of this Permit, then the Control Officer shall issue a written notice to the owner and/or operator of the dust-generating operation explaining such determination.

b. The owner and/or operator of a dust-generating operation shall make written revisions to the Dust Control Plan and shall submit such revised Dust Control Plan to the Control Officer within three working days of receipt of the Control Officer’s written notice, unless such time period is extended by the Control Officer, upon request, for good cause. During the time that such owner and/or operator is preparing revisions to the approved Dust Control Plan, such owner and/or operator must still comply with all requirements of this Permit.

[SIP Rule 310 §403.1]

c. The Permittee shall request a Dust Control Plan revision with a submittal in the manner and form prescribed by the Control Officer if:

i. The acreage of a project changes;
ii. The permit holder changes;
iii. The name(s), address(es), or phone numbers of person(s) responsible for the submittal and implementation of the Dust Control Plan and responsible for the dust-generating operation change; and

iv. If the activities related to the purposes for which the Dust Control permit was obtained change.

[Rule 310 §403.2]

29. Recordkeeping:

The Permittee shall maintain the following records for a period of at least five years from the date such records are established and make them available to the Control Officer upon request:

a. For dust-generating operations with a disturbed surface area equal to or greater than 0.10 acre (4,356 square feet), the Permittee shall keep a written record of self-inspection on each day dust-generating operations are conducted. Self-inspection records shall include daily inspections for crusted or damp soil, trackout conditions and clean-up measures, daily water usage, and dust suppressant application. Such written record shall also include the following information:

i. Method, frequency, and intensity of application or implementation of the control measures;
ii. Method, frequency, and amount of water application to the site;
iii. Street sweeping frequency;
iv. Types of surface treatments applied to and maintenance of trackout control devices, gravel pads, fences, wind barriers, and tarps;
v. Types and results of test methods conducted;
vi. If contingency control measures are implemented, actual application or implementation of contingency control measures and why contingency control measures were implemented;
vii. List of subcontractors’ names and registration numbers updated when changes are made; and
viii. Names of employee(s) who successfully completed dust control training class(es), date of the class(es) that such employee(s) successfully completed, and name of the agency/representative who conducted such class(es).

[SIP Rule 310 §502.1]

b. For dust-generating operations with a disturbed surface area less than 0.10 acre (4,356 square feet), the Permittee shall compile and retain records (including records on any street sweeping, water applications, and maintenance of trackout control devices, gravel pads, fences, wind barriers, and tarps) that provide evidence of control measure application, by indicating the type of treatment or control measure, extent of coverage, and date applied.
c. Upon verbal or written request by the Control Officer, the log or the records and supporting documentation shall be provided as soon as possible but no later than 48 hours, excluding weekends. If the Control Officer is at the site where requested records are kept, records shall be provided without delay.

[SIP Rule 310 §502.3]

30. Records Retention:

a. For dust-generating operations with a disturbed surface area equal to or greater than 0.10 acre (4,356 square feet), the Permittee shall retain copies of approved Dust Control Plans, control measures implementation records, and all supporting documentation for at least six months following the termination of the dust-generating operation and for at least two years from the date such records were initiated.

[SIP Rule 310 §503]

b. For dust-generating operations with a disturbed surface less than 0.10 acre (4,356 square feet), the Permittee shall retain records required by this rule for at least five years from the date such records are established.

[SIP Rule 100 §504]

GENERAL CONDITIONS

31. Coverage under the General Permit:

Any facility shall be eligible for coverage under this General Permit if the facility meets the requirements specified in the Specific Conditions Section of this Permit and completes an Application for the Authority to Operate and/or Construct. However, if the facility does not meet the provisions of the Specific Conditions Section, the operation will be considered ineligible for coverage and the applicant may be required by the Control Officer to obtain an individual source permit.

[Rule 230 §303][Locally Enforceable Only]

32. Revocation of the Authority to Operate under this General Permit:

If the Permittee is notified by the Control Officer of the revocation of the Authority to Operate under this General Permit because of expiration, termination, or cancellation, the Permittee must file an application for an individual source permit. The application for an individual source permit must be filed within 180 days of receiving the notice from the Control Officer. The Permittee may continue to operate under this General Permit until the earlier of either

a. The date that it submits a complete application for an individual source permit, or

b. The date 180 days after receipt of the notice of expiration, termination, or cancellation.

[Rule 230 §311][Locally Enforceable Only]

33. Posting of Permit:

This Permit shall be posted in a clearly visible and accessible location on the site where the equipment is installed.

[SIP Rule 200 §312]

34. Compliance:

a. The issuance of any Permit or Permit revision shall not relieve the Permittee from compliance with any Federal laws, Arizona laws, or the County or SIP Rules, nor does any other law, regulation or permit relieve the Permittee from obtaining a Permit or Permit revision required under the County Rules.

[SIP Rules 200 §309, 310.3, 220 §406.3]

b. The Permittee shall comply with all conditions of this Permit including all applicable requirements of Federal laws, Arizona laws, and Maricopa County Air Pollution Control Rules and Regulations now in effect and as amended in the future. Any Permit noncompliance is grounds for enforcement action, Permit termination or revocation, or for denial of a renewal application. In addition, non-compliance with any federally enforceable requirements constitutes a violation of the Clean Air Act.
c. It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with these Permit Conditions.

d. Rights and Privileges: This Permit does not convey any property rights or exclusive privilege of any sort.

35. Malfunctions, Emergency Upsets, and Excess Emissions:
An affirmative defense of an emergency, excess emission, and/or during startup and shutdown shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence as outlined in Rule 130 for emergencies and Rule 140 for excess emissions.

36. Revision / Reopening / Revocation:
The Permit may be revised, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a permit revision, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any Permit Condition.

37. Records:

a. The Permittee shall furnish information that the Control Officer may request in writing to determine whether cause exists for revising, revoking and reissuing this permit, or terminating this permit, or to determine compliance with this permit. The information shall be provided in a timeframe specified by the Control Officer. Upon request, the Permittee shall also furnish to the Control Officer copies of records required to be kept by this Permit. For information claimed to be confidential, the Permittee shall furnish a copy of such records directly to the Administrator along with a claim of confidentiality.

b. If the Permittee fails to submit any relevant facts or has submitted incorrect information in a permit application, the Permittee shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, the Permittee shall provide additional information as necessary to address any requirements that become applicable to the source after the date a complete application is filed but prior to release of a proposed permit. Willful misrepresentation of facts in a permit application is cause for revocation or denial of a permit.

38. Certification of Truth, Accuracy, and Completeness:
Any document that is required to be submitted by this General Permit, including reports, shall contain a certification by the facility owner, or other responsible official as defined in County Rule 100 §200.110, of truth, accuracy, and completeness. This certification and any other certification required under this permit shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

39. Facility Changes Requiring an Individual Source Permit:

a. The following changes shall only be made after the Permittee obtains an individual source permit:

i. A change that triggers a new applicable requirement, violates an existing applicable requirement, or violates any of the Specific Conditions of this Permit.

ii. A change that will require a case-by-case determination of an emissions limitation.
iii. A change that will result in the burning of any fuel that is not currently authorized by this permit.  
   [SIP Rule 200 §301]

b. Coverage under this General Permit shall terminate on the date the individual source permit is issued.  
   [Rule 230 §307][Locally Enforceable Only]

40. Facility Changes Allowed:

a. The Permittee may make the following changes at the facility only after providing written notification to the Control Officer at least 30 days before the change and only if such changes do not require the Permittee to obtain an individual source permit:

   i. Adding new emissions units.
   ii. Installing a replacement emissions unit.
   iii. Adding or replacing air pollution control equipment.

b. The written notification shall include the following:

   i. When the proposed change will occur;
   ii. A description of the change; and
   iii. Any change in emissions of regulated air pollutants.

c. The Permittee shall keep a record of any physical change or change in the method of operation that could affect emissions. The record shall include a description of the change and date the change occurred.  
   [Rule 230 §312][Locally Enforceable Only]

41. Right to Entry:

a. The Control Officer during reasonable hours, for the purpose of enforcing and administering County or SIP Rules or the Clean Air Act, or any provision of the Arizona Revised Statutes relating to the emission or control prescribed pursuant thereto, may enter every building, premises, or other place, except the interior of structures used as private residences. Every person is guilty of a petty offense under A.R.S. 49-488 who in any way denies, obstructs or hampers such entrance or inspection that is lawfully authorized by warrant.

b. The Permittee shall allow the Control Officer or his designated representatives, upon presentation of proper credentials (e.g., Maricopa County Air Quality Department identification) and other documents as may be required by law, to:

   i. Enter upon the Permittee’s premises where a source is located, or emissions-related activity is conducted, or where records are required to be kept pursuant to the conditions of the permit;
   ii. Have access to and copy, at reasonable times, any records that are required to be kept pursuant to the conditions of the permit;
   iii. Inspect, at reasonable times, any sources, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required pursuant to this permit;
   iv. Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the Permit or other applicable requirements; and
   v. Record any inspection by use of written, electronic, magnetic, and photographic media.  
   [SIP Rules 100 §105, 220 §302.17-21]

42. Severability:

The rules, paragraphs, clauses, provisions, and/or sections of this Permit are severable, and, if any rule, paragraph, clause, provision, and/or section of this Permit is held invalid, the remainder of this Permit shall not be affected thereby.  
   [SIP Rule 220 §302.9]
