

Rule 323 Clarification

Limitations – Sulfur in Fuel: An owner or operator of any applicable equipment listed in Section 102 of this rule that burns liquid fuel oil or a mixture or blend of fuel oil with any other fuels shall use only ultra low sulfur diesel. An owner or operator using waste derived fuel gas shall use only waste derived fuel gas that contains no more than 0.08% sulfur by weight, alone or in combination with other fuels.

Existing low sulfur diesel fuel purchased (or otherwise obtained) prior to November 2, 2016 may be used until depleted.

Low sulfur diesel means fuel oil containing less than or equal to 0.05% sulfur by weight.

Ultra low sulfur diesel means fuel oil containing less than or equal to 0.0015% sulfur by weight.
