

WHO WE ARE

FCD was created in 1959 to reduce the risk of flooding to people and property. Flood control structural projects and programs that have occurred since the creation of the District provide ongoing opportunities for economic vitality, alternative water management and long-term benefits for the community and environment.

The District is a political subdivision of the State of Arizona and is governed by a Board of Directors who also serve as the Maricopa County Board of Supervisors. It is advised by the citizen Flood Control Advisory Board. As a special taxing district, FCD has authority to levy a secondary property tax on parcels within the county to fund flood control efforts. The District's jurisdiction encompasses more than 9,200 square miles. It has partnered on over 151 flood control structures and operates 397 ALERT Stations covering 11,820 square miles.

The District strives to stay ahead of development, which opens up continued opportunities for collaboration. Flood education and tools such as GIS and drone technology, Flo-2D modeling and online permitting help FCD continue to improve, protect and facilitate interaction with stakeholders and citizens.

WHAT WE DO

- Develop 5-year Floodplain Management Plans, which set goals and actions to address the county's vulnerability
- Identify flood hazards through Studies
- Cost share with communities to build, maintain and operate flood control structures (dams, levees, basins, channels & storm drains)
- Issue Floodplain Use Permits and conduct inspection
- Provide flood related technical support to communities
- Oversee county-wide Flood Warning & Response System
- Implement water quality best management practices
- Educate public on flood safety, risk reduction and flood insurance

MESA

COLLABORATION & PARTNERSHIPS

Historically, floods have caused millions of dollars worth of damage to homes, businesses, roads and farmland. Although considerable strides have been made in identifying flood hazards, building flood control structures and establishing programs and regulations, there is still work to be done. Flooding during more recent monsoon storms demonstrated that regional structures are still needed in areas to protect existing development.

In partnership with the City of Mesa, the Flood Control District (FCD) of Maricopa County reduces risk from flooding so property damage and loss of life is minimized, economic development is supported in a safe and responsible manner and stormwater is recognized as a resource for long-term benefit to the community and environment. Many of the completed structural flood control projects protecting the public also enhance the community as multi-use opportunities such as recreational features, trails and open spaces.

Storm Event 2014

FCD is responsible for managing the floodplain permitting for the City of Mesa. Additionally, FCD provides other services for the City such as: area drainage studies, cost share on flood control projects, flood warning (ALERT) and educational outreach.

FCD continues to reduce risk through new structures (Capital Improvement Program), purchase of homes and floodproofing to help homeowners in floodprone areas (Floodprone Properties Assistance Program) and partially funding small/local projects through the Small Project Assistance Program (SPAP). Ongoing collaboration with citizens, municipalities, agencies and developers is essential to ensure that people and property remain safe during floods as the county continues to grow and responsible economic growth is supported.

PARTNERSHIPS AT A GLANCE

CAPITAL INVESTMENTS

Cost-sharing partnerships of approximately \$16 million in capital investments over the last 15 years for flood control structures benefiting area residents (excludes funding for hazard identification studies, maintenance, ALERT stations and other programs).

SMALL PROJECT ASSISTANCE PROGRAM

18 Projects Completed ~ \$4,065,658
SPAP Projects Protect 303 Structures

CUSTOMER INQUIRIES (In the last 5 years)

998 Floodplain Determinations
226 General Information
9 Storm Event Calls
9 Public Records Requests
295 Community Permits Processed

STEM CURRICULUM OUTREACH

STEM Curriculum distributed to 1 school
1 Visit to demonstrate the Interactive Flood Simulation Model to students

COMPLETED STRUCTURES

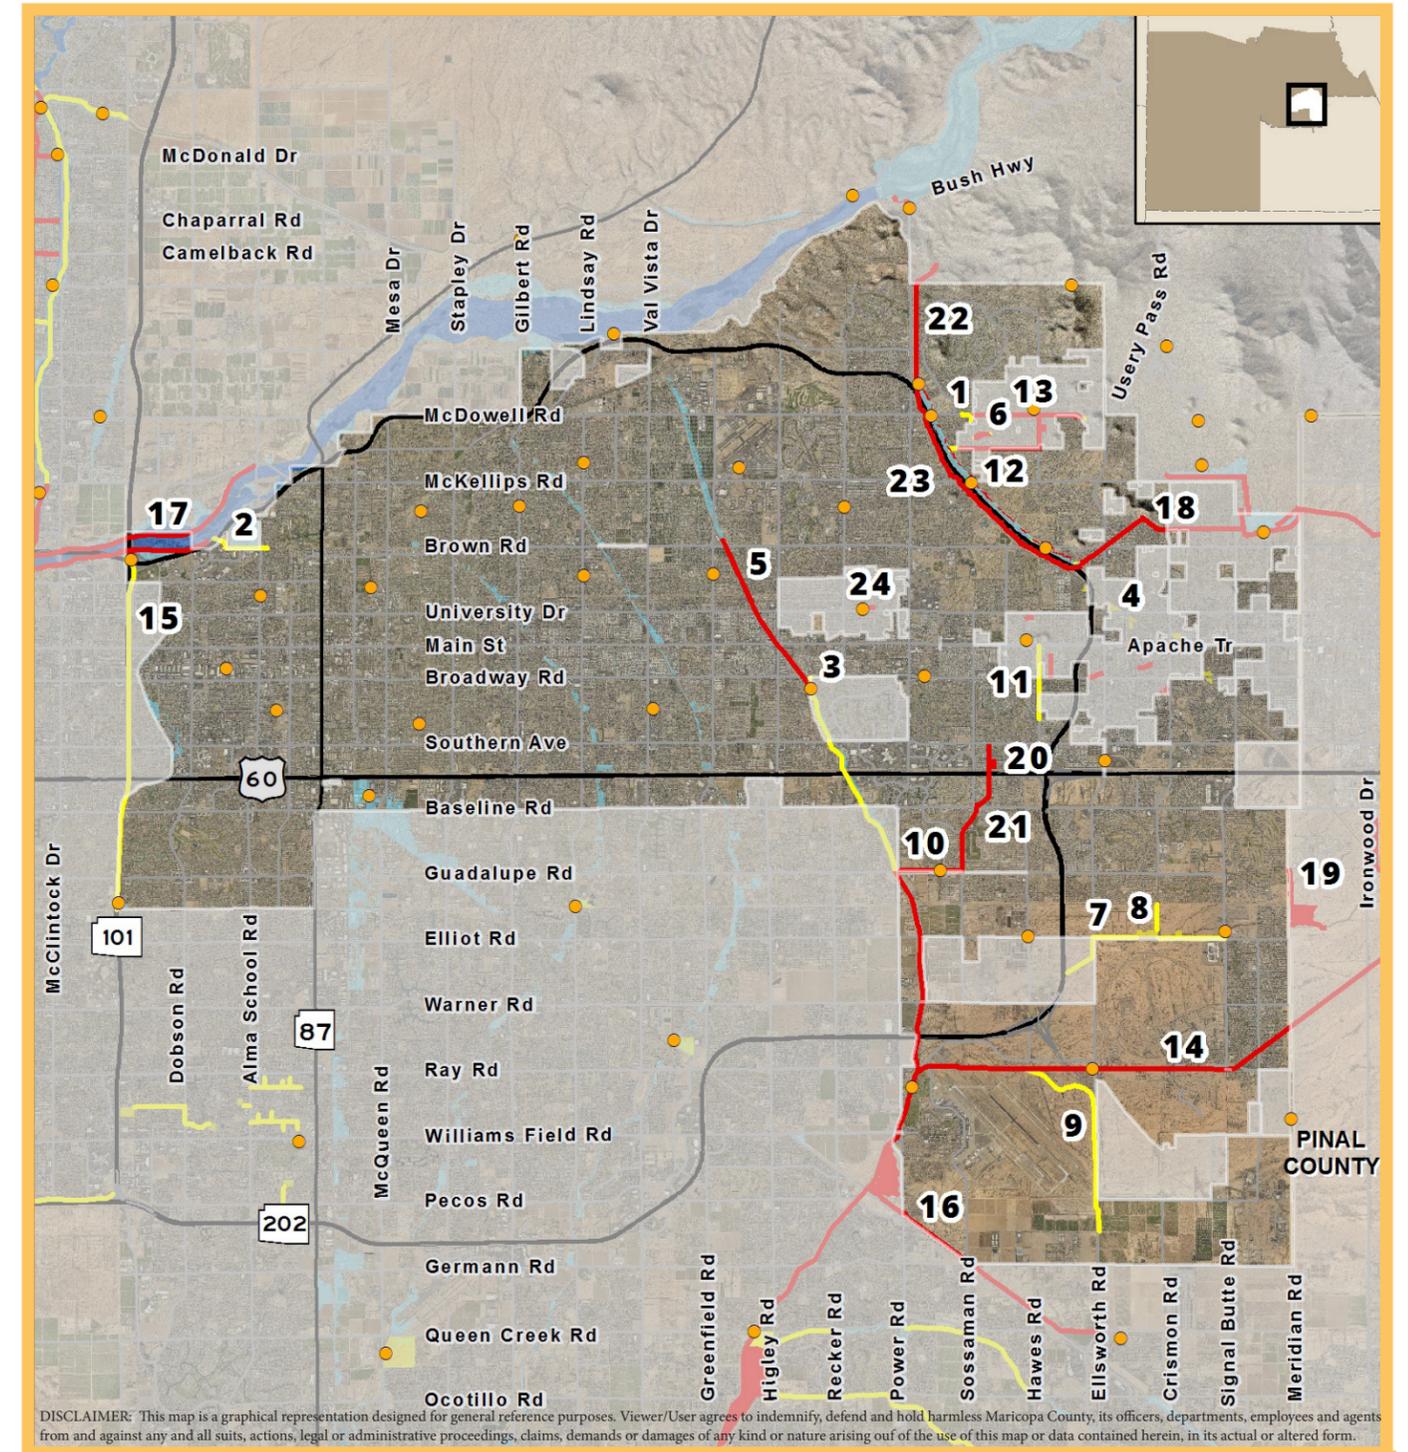

1. 76th Street Basin
2. Alma School Drain
3. Broadway Road Collector
4. CAP Canal Basins
5. East Maricopa Floodway
6. East Mesa Drain 3 – Valley View 4 Subdivision
7. Elliot Road Channel
8. Elliot Road Basin
9. Ellsworth Road Channel
10. Guadalupe Box & Channel
11. Hawes Road Channel Improvements
12. Hermosa Vista/Hawes Road Storm Drain & Outlet
13. McDowell Road Drain
14. Powerline Floodway
15. Price Road Drain
16. Rittenhouse Road Drain
17. Salt River Channel Levee
18. Signal Butte Floodway
19. Siphon Draw Basin Meridian Road Inlet Channel
20. Sossaman Road Basin
21. Sossaman Road Drain
22. Spook Hill Floodway
23. Spook Hill FRS
24. University Drive Basin

COMPLETED STUDIES

- East Mesa Area Drainage Master Plan (ADMP) Update
- Eastern Maricopa County Area Drainage Master Study (ADMS)
- Southeast Mesa ADMP
- Spook Hill ADMP
- Chandler-Gilbert Flood Delineation Study (FDS), Phase 3
- Tempe Canal FDS
- East Mesa Hydrology Update

Siphon Draw Basin

Maricopa County OET, GIS Division, 8/24/2018

- ALERT Rain & Stream Gages
- FEMA Floodway
- Structure Maintained by FCD
- Structure Maintained by Other
- FEMA Floodplain
- FCD Pending Floodway
- FCD Pending Floodplain

GENERAL FLOODPLAIN INFORMATION

2.4 sq-mi of floodplain in 138.5 sq-mi of City limits = ~ 1.7%
Benefits from 32 ALERT gages in city & 12 stations within 5 mi
