

WHO WE ARE

FCD was created in 1959 to reduce the risk of flooding to people and property. Flood control structural projects and programs that have occurred since the creation of the District provide ongoing opportunities for economic vitality, alternative water management and long-term benefits for the community and environment.

The District is a political subdivision of the State of Arizona and is governed by a Board of Directors who also serve as the Maricopa County Board of Supervisors. It is advised by the citizen Flood Control Advisory Board. As a special taxing district, FCD has authority to levy a secondary property tax on parcels within the county to fund flood control efforts. The District's jurisdiction encompasses more than 9,200 square miles. It has partnered on over 151 flood control structures and operates 397 ALERT Stations covering 11,820 square miles.

The District strives to stay ahead of development, which opens up continued opportunities for collaboration. Flood education and tools such as GIS and drone technology, Flo-2D modeling and online permitting help FCD continue to improve, protect and facilitate interaction with stakeholders and citizens.

WHAT WE DO

- Develop 5-year Floodplain Management Plans, which set goals and actions to address the county's vulnerability
- Identify flood hazards through Studies
- Cost share with communities to build, maintain and operate flood control structures (dams, levees, basins, channels & storm drains)
- Issue Floodplain Use Permits and conduct inspection
- Provide flood related technical support to communities
- Oversee county-wide Flood Warning & Response System
- Implement water quality best management practices
- Educate public on flood safety, risk reduction and flood insurance

QUEEN CREEK

COLLABORATION & PARTNERSHIPS

Historically, floods have caused millions of dollars worth of damage to homes, businesses, roads and farmland. Although considerable strides have been made in identifying flood hazards, building flood control structures and establishing programs and regulations, there is still work to be done. Flooding during more recent monsoon storms demonstrated that regional structures are still needed in areas to protect existing development.

In partnership with the Town of Queen Creek, the Flood Control District (FCD) of Maricopa County reduces risk from flooding so property damage and loss of life is minimized, economic development is supported in a safe and responsible manner and stormwater is recognized as a resource for long-term benefit to the community and environment. Many of the completed structural flood control projects protecting the public also enhance the community as multi-use opportunities such as recreational features, trails and open spaces.

Cloud Basin Channel Flooding 2014

FCD is responsible for managing the floodplain permitting for the Town of Queen Creek. However, FCD provides other services for the Town such as: area drainage studies, cost share on flood control projects, flood warning (ALERT) and educational outreach.

FCD continues to reduce risk through new structures (Capital Improvement Program), purchase of homes and floodproofing to help homeowners in floodprone areas (Floodprone Properties Assistance Program) and partially funding small/local projects through the Small Project Assistance Program (SPAP). Ongoing collaboration with citizens, municipalities, agencies and developers is essential to ensure that people and property remain safe during floods as the county continues to grow and responsible economic growth is supported.

PARTNERSHIPS AT A GLANCE

CAPITAL INVESTMENTS

Cost-sharing partnerships of approximately \$32 million in capital investment over the last 15 years for flood control structures benefiting area residents (excludes any funding for hazard identification studies, maintenance, ALERT stations and other programs).

CUSTOMER INQUIRIES (In the last 5 years)

- 141 Floodplain Determinations
- 42 General Information
- 22 Community Permits Processed

COMPLETED STRUCTURES

1. Cloud Road/Sossaman Basin
2. Cloud Road/Sossaman Outlet
3. Queen Creek Channel
4. Rittenhouse Road Drain
5. Sonoqui Phase I
6. Sonoqui Phase II

COMPLETED STUDIES & PLANS

- East Mesa Hydrology Update
- San Tan West ADMS
- Sonoqui Wash Improvement - Phase II

GENERAL FLOODPLAIN INFORMATION

1.3 sq-mi of floodplain in 29.2 sq-mi of town limits = ~ 4.5%
 Benefits from 4 ALERT gages in town & 7 stations within 5 mi

Sonoqui Wash II
