For the purpose of this rule, thoroughly inspect means that all ACM has been identified and quantified, and all RACM has been accurately categorized. The requirement to inspect for the presence of asbestos shall not apply if the owner or operator assumes that the materials present are RACM and complies with all requirements that are applicable to the removal, handling, and disposal of RACM. In addition:
 - (1)** The thorough inspection for the presence of asbestos must be conducted by an AHERA building inspector.
 - (a)** An AHERA building inspector may assume a given material contains asbestos. Any material assumed to contain asbestos does not have to be sampled and analyzed by a laboratory but a determination of its condition (i.e., friability) and category must be made and documented as specified in 301.9(a)(2)(c) and (d).
 - (2)** The inspection for the presence of asbestos must be documented in a written report that meets all of the following requirements:
 - (a)** Clearly identifies all materials that were sampled and provides a legible copy of the laboratory chain of custody indicating who collected the samples;
 - (b)** Includes analytical results from a laboratory accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) showing that samples analyzed for the presence of asbestos were analyzed using one of the following test methods:

 - (c)** Categorizes all ACM as Category I nonfriable ACM, Category II nonfriable ACM, or RACM, in accordance with the definitions in 40 CFR 61, Subpart M; and

- (a) The use of amended water is not required when the owner or operator has obtained prior written approval from the Administrator based on a written application that wetting would unavoidably damage equipment or present a safety hazard, however the owner or operator shall comply with 40 CFR 61.145(c)(3)(i)(B) or 40 CFR 61.145(c)(3)(ii) and (iii); and
 - (b) The use of amended water is not required when the temperature at the point of wetting is below 32 °F (0 °C), however the owner or operator shall comply with 40 CFR 61.145(c)(7)(ii) and (iii).
 - (c) The use of amended water is not required for ordered demolitions, as defined in 40 CFR 61.145(a)(3).
