

Notify MCDOT

Notify MCDOT is a free and easy-to-use service to report non-emergency roadway conditions

Quick Tips when using *Notify MCDOT*

Choose the correct category.

Requests placed in the 'other' or incorrect category may experience a delay as they are not directly assigned to staff.

Include photos with your request.

Including photos helps expedite a request as crews can identify the issue more clearly. Clear photos will make it easier for crews to address the issue.

Double-check the address or location.

This helps our team locate the issue more quickly.

Include an email address with your request.

This allows us to contact you in case we have follow-up questions and allows us to send you updates on the status of your request via email.

Download ***Notify MCDOT*** via the Apple App Store, the Google Play Store or visit mcdot.me/notify
