E DOCS

Purpose: To verify all available data is reviewed and standardized processes are followed before an animal is euthanized.

Procedure: This form is to be completed by the medical team to verify and collect critical medical data.

CLINIC PROTOCOLS FOR IRREMEADIABLY SUFFERING ANIMALS 11/04/22

Animals that are suffering and actively dying (e.g. agonal/comatose) may be euthanized immediately upon receiving approval from

two veterinarians. Checklist to be completed following the procedure, with explanation.

Veterinarian 1: [REDACTED] DVM

Veterinarian 2: [REDACTED] DVM

Explanation: Highly likely CDV + (CDV Cq value 37.27) with active clinical signs.

Urgent Medical Issues: Confirm each item with (Y/N/NA) before proceeding: 11/04/22

Seizures: n Uncontrollable Pain: n Difficulty Breathing: y Active and/or Uncontrollable Hemorrhaging: n Lack of Deep Pain: n Other: Highly likely CDV + with active clinical signs; HPTD to prevent suffering from highly contagious and possibly fatal disease.

Other Medical Considerations Confirm each item with (Y/N/NA) before proceeding: 11/04/22

Needing intervention and rehab consideration, long term care: y

Established Prognosis: y

Have time and resources to treat: n

Have room and resources for follow up care: n

Dog is candidate for foster: n

Rescue or NH will take once stable: na

Outside funding Available: Details: na

Eval type OBSERVATION

soft wiggly body jumped up on handler several times walked to truck on leash and allowed me to pick up and place into truck kennel without issue

Eval date 08/09/2022

Eval type INTAKE ASSESSMENT

## Information for Animal ID # A4768685

brought onto ramp on leash, alligator rolling at door way but otherwise good, allows attention, vaccinated with muzzle wrap, walked to kennel in bucket

Eval date 08/13/2022 Eval type EVALUATION

greeted handler at gate, easy leash placement, walked well out of building, light to moderate pull on leash while walking, explored yard, occasionally came up to handler, allowed petting, slightly stiff body during petting, continued exploring yard when petting was done, tail flagging while sniffing around yard, dog in I300 barking repeatedly, dog ignored I300 while exploring, after some time solicited attention from handler, loose open mouth panting, wagging tail, leaned into petting, rubbed face and head against handler's legs, when leaving yard dog approached I300 kennel, dog in I300 began barking and growling, dog stiffened, tail flagging, handler picked up leash while dog was distracted, dog pulled towards I300, barking and growling, leash pressure used to coax dog away, when leash was pulled dog turned and jumped up at handler, front paws on handler's hip, barked at handler, dropped paws back to ground with leash pressure pulling away from handler, turned back and tried to pull towards I300, leash pressure used to coax dog away, exited yard, walked back to kennel, occasionally stopped at other dog kennels but continued walking immediately with light leash pressure, stopped outside building, required moderate leash pressure to coax back into building, stopped at kennel, pulled back when handler applied pressure, hesitantly followed handler into kennel, attempted to push out when handler was exiting, moderate leash pressure used to keep dog in kennel, allowed leash removal without issue

Eval date 08/20/2022 Eval type WALK

per volunteer - Easy leash and pull from back. Hesitant exiting wing, but calmed down after releasing some leash pressure. Great on walk, not reactive towards other dogs. Payed down in between handlers legs and solicited belly rubs. Allowed tick removal. Played in pool in the play yard. Loves pets, not interested in treats. Easy return and unleash.

Eval date 09/06/2022 Eval type WALK

Out for walk/meet and greet

Eval date 10/11/2022 Eval type INTAKE ASSESSMENT

Soft body, wiggly tail. Affiliative, jumped soliciting attention. Walked to kennel no issue.

Eval date 10/12/2022 Eval type OBSERVATION

incorrect entry, please disregard

Eval date 10/12/2022 Eval type EVALUATION

Approached rear of kennel, dog came forward with soft body and relaxed wagging tail. Pushed against gate during leash placement, pulled moderately out and down the wing to yard. Once in yard played in pool, chased ball, ate offered treats. Would not sit, but would move head backwards to reach treats, took gently. Jumped up at handlers for attention, became slightly mouthy when being pet. When another dog approached fence line this canine rushed at gate, barking, whining, and jumping up on fence. Handler retrieved leash, dog pulled moderately back to kennel; able to unleash with ease.

Eval date 10/17/2022 Eval type OBSERVATION

sitting on kuranda took treat nicely

Eval date 10/18/2022 Eval type WALK

on approach for walk, canine was standing at front of kennel, had soft body, soft eyes, neutral tail wag. canine had heavy pull on leash out of wing and to play yard. when in play yard canine ran around yard, and solicited attention from handlers. canine allowed all petting on head, neck, and body. canine could be coaxed with treat to sitting, could not catch treat. during all interactions with handlers canine had soft body, soft eyes. while walking back from play yard canine had heavy pull on leash, canine fence fought to kennel and required moderate positive leash pressure to return to kennel. canine allowed leash removal.

Eval date 10/24/2022 Eval type OBSERVATION
