10/24/2022 TEST UNHEALTHY/MANAGEABLE

10/24/22 14:57 Swab collected for IDEXX CANINE RESPIRATORY PCR (2524). Confirmation Number 2600.

10/26/2022 DIAGNOSTICS UNHEALTHY/MANAGEABLE

10/26/22 16:13

MOLECULAR DIAGNOSTICS

TEST RESULT UNITS

Canine Distemper Virus RealPCR a POSITIVE

CDV Quantity b 1862 THOUS/SWAB

Fold Difference From Cutoff 17.75

CDV WILDTYPE INFECTION

The CDV viral load is high, well above the levels seen with vaccine interference. The positive CDV PCR result is most likely caused by a wildtype strain and indicates infection.

CDV Interpretation

Bordetella bronchiseptica RealPCR NEGATIVE

Canine Adenovirus Type 2 RealPCR NEGATIVE

Canine Herpesvirus Type 1 RealPCR POSITIVE

# Information for Animal ID # A4797328

Canine Parainfluenza Virus RealPCR NEGATIVE  
Canine Respiratory Coronavirus RealPCR NEGATIVE  
H3N2 Influenza Virus RealPCR NEGATIVE  
Influenza A Virus RealPCR NEGATIVE  
Mycoplasma cynos RealPCR POSITIVE  
Strep. equi subsp zooepidemicus RealPCR NEGATIVE  
Canine Pneumovirus RealPCR POSITIVE

10/27/2022 EXAM UNHEALTHY/UNT/UNM

M22-614117 A4797328 10/5/2022 NOTE  
10/05/22 11:25 [REDACTED]  
3 of 3. Found with 2 puppies A4797326 and A4797327  
2 different residents stated puppies were born in complex.  
previous reports for this dog stated that kids were throwing rocks at her.

M22-619970 A4797328 10/27/2022 E DOCS

Purpose: To verify all available data is reviewed and standardized processes are followed before an animal is euthanized.  
Procedure: This form is to be completed by the medical team to verify and collect critical medical data.

**CLINIC PROTOCOLS FOR IRREDEMIABLY SUFFERING ANIMALS**

Animals that are suffering and actively dying (e.g. agonal/comatose) may be euthanized immediately upon receiving approval from two veterinarians. Checklist to be completed following the procedure, with explanation.

Veterinarian 1: [REDACTED] DVM  
Veterinarian 2: [REDACTED] DVM  
Explanation: Distemper positive, wild type

Urgent Medical Issues: Confirm each item with (Y/N/NA) before proceeding:

Seizures: N Uncontrollable Pain: N Difficulty Breathing: N Active and/or Uncontrollable Hemorrhaging: N Lack of Deep Pain: N Other: Y

Other Medical Considerations Confirm each item with (Y/N/NA) before proceeding:

Needing intervention and rehab consideration, long term care: N  
Established Prognosis: Poor to grave  
Have time and resources to treat: N  
Have room and resources for follow up care: N  
Dog is candidate for foster: N  
Rescue or NH will take once stable: N

**Any evaluations, assessments, or staff observations will print below.**

Eval date 10/05/2022 Eval type OBSERVATION

moved away from handler on approach. brought puppy out and she approached to sniff puppy. head ducked, growled, and moved away when attempting to place leash or snare. had second officer catch in net while holding puppy to keep her close. removed from net with snare. walked to truck. lifted onto truck on snare.

# Information for Animal ID # A4797328

Eval date 10/05/2022                      Eval type INTAKE ASSESSMENT

brought onto ramp on leash, stiff body, low to ground, wide eyes, tail tucked, vaccinated with muzzle wrap, walked to kennel on leash

Eval date 10/08/2022                      Eval type EVALUATION

Dog was outside on approach, timid, wide-eyed, would not come in; handler closed dog out. Dog met handler at the back gate, wary but interested in coming out. Allowed leash placement, easy pull, walked well on leash but easily startled by barking dogs. In play yard dog remained timid but explored briefly then came to handler, pancaked and allowed handling and petting. Relaxed with handler over time, followed handler to the yard gate. Walked well on the return, reluctant to enter the kennel; handler was able to guide dog in, dog tried to follow handler out. Handler was able to hold dog in while removing the leash. No dog-to-dog assessment completed.

Eval date 10/15/2022                      Eval type WALK

Per volunteer -Huan was very timid when I went to leash her. I closed the guillotine to the inside to make leashing her easier. She allowed leashing and walked out of the wing with a tucked tail but no pulling or pancaking. She continued to have a tucked tail once outside so we took it slow and walked over to the field. The further away from the shelter the more relaxed she became. She laid down in the grass for some updated pics but wasn't interested in any treats. She allowed petting but did not solicit it. She's a very calm but shy girl. She walked very easily back to the shelter. Once entering the wing she hesitated but did walk back to the kennel on her own easily. Did not react or engage with the barking dogs. Easily unleashed and returned.
