

Information for Animal ID # A4797943

Animal ID #: A4797943 **Species:** DOG **Sex:** Neutered Male **Age:** 1 Yrs. Months
Name: SHELTON **Breed:** Primary- AM PIT BULL TER Secondary-
Color: Primary- TAN Secondary- WHITE

If animal has been impounded, kennel intake and outcome information will be printed below.

Kennel #: E305 **Status:** WAIT RELS **Intake Type:** STRAY **Intake Subtype:** [REDACTED] [REDACTED]
Location Impounded/Found: [REDACTED] **City:** [REDACTED]
Intake Date: 10/7/22 **Intake Time:** 1:12 pm **Release Date:** 10/10/22
Outcome Type: EUTH **Outcome Subtype:** DIS-MED **Condition:** \$25
Outcome Date: 11/4/22 **Outcome Time:** 5:41 pm

Below is the information on the person that called about or brought in the animal.

Person ID #: [REDACTED] **Name:** [REDACTED] [REDACTED]
Address: [REDACTED] [REDACTED] **Apt/Space:**
City: [REDACTED] **State:** [REDACTED] **Zip Code:** [REDACTED] **Phone:** [REDACTED] [REDACTED]

If the animal was adopted, returned or sent to a New Hope group, the information will print below.

 L/N: NSF
 BCS: 4.5 / 9
 Dental grade: 0 / 4

Observations during pre-op/procedure: irritation to scrotum prior to clipping - e-collar 10 days.

Treatments:

Pyrantel pamoate (50 mg/ml) 5.0 ml PO administered once pre-op.
 Carprofen (50 mg/ml) 2.0 ml SQ administered once pre-op.
 Rabies vaccine SQ, R lateral hip, administered by [redacted]
 Implanted microchip SQ, # [redacted] Placement confirmed via microchip scanner.

Induction & Prep Tech Initials [redacted] / [redacted]

Anesthesia:

Induced with TTDex (5 ml cake 100 mg/ml Telazol to 2.5 ml 10 mg/ml Butorphanol + 2.5 ml 0.50 mg/ml Dexmedetomidine)
 0.5 ml IM at 0829
 Intubated at 0838 with 10.0 -size ET tube
 Maintained on Isoflurane and Oxygen.
 Anesthesia End Time: 0844
 Anesthesia Tech Initials: [redacted] Recovery Tech Initials [redacted]

Monitoring:

Time: 0838 T 101.1 °F; HR 90 bpm; RR 20 brpm
 Time: 0853 T 101.0 °F; HR 80 bpm; RR 10 brpm
 Time: 0908 T 100.3 °F; HR 70 bpm; RR 20 brpm
 Time: 0923 T 99.3 °F; HR 60 bpm; RR 20 brpm
 End Recovery Time: 0931 T 99.3 °F; HR 60 bpm; RR 20 brpm
 Uneventful recovery.

Surgery – Canine Orchiectomy (Neuter), performed by [redacted]

Pre-scrotal incision made with no. 15 blade. Closed technique, single ligation of spermatic cords with strangle knots using 2/0 Webmax. 2-layer closure: SQ layer closed with simple continuous sutures, continuing into continuous intradermal using 2/0 Webmax. Green tattoo etched. Applied tissue adhesive over pre-scrotal incision and tattoo.

Rx and/or Post-op recommendations: Recommend follow up with primary veterinarian regarding overall health, baseline bloodwork, and preventative care.

noticed k9 has green nasal discharge

10/21/22 18:12

Abbreviated examination due to potentially infectious symptoms.

Information for Animal ID # A4797943

General appearance/attitude: BAR, laying, rose to greet
BCS: 4/9
Respiratory: mucoid nasal discharge, licking nose
Ocular: NSF
GI: food bowl is empty
Derm: stained pink haircoat on head and trunk

Assessment:
- Mucoid nasal discharge - suspect CIRDC, R/O other

Plan/treatment:
- Doxycycline 100 mg - 2.5 tab PO SID x 14 days
- Recheck respiratory clinical signs at end of treatment course
- Monitor for changes to p's condition
- Adopter to follow up with rdvm regarding overall health, baseline labwork, and long term preventative health care plan

M22-622495 A4797943 11/5/2022 E DOCS

Purpose: To verify all available data is reviewed and standardized processes are followed before an animal is euthanized.
Procedure: This form is to be completed by the medical team to verify and collect critical medical data.

Information for Animal ID # A4797943

Animals that are suffering and actively dying (e.g. agonal/comatose) may be euthanized immediately upon receiving approval from two veterinarians. Checklist to be completed following the procedure, with explanation.

Veterinarian 1: [REDACTED] DVM
Veterinarian 2: [REDACTED] DVM

Explanation: Highly likely CDV + (CDV Cq value 13.28) with active clinical signs (lethargic, underweight, OU ocular discharge and blepharospasm, coughing, nasal discharge).

Urgent Medical Issues: Confirm each item with (Y/N/NA) before proceeding: 11/04/22

Seizures: n Uncontrollable Pain: n Difficulty Breathing: y Active and/or Uncontrollable Hemorrhaging: n Lack of Deep Pain: n Other: Highly likely CDV + with active clinical signs; HPTD to prevent suffering from highly contagious and possibly fatal disease.

Other Medical Considerations Confirm each item with (Y/N/NA) before proceeding: 11/04/22

Needing intervention and rehab consideration, long term care: y

Established Prognosis: y

Have time and resources to treat: n

Have room and resources for follow up care: n

Dog is candidate for foster: n

Rescue or NH will take once stable: na

Outside funding Available: Details: na

Any evaluations, assessments, or staff observations will print below.

Eval date 10/07/2022 Eval type INTAKE ASSESSMENT

brought onto ramp on leash, soft wiggly body, seeks attention, vaccinated with light restraint, walked to kennel on leash

Eval date 10/09/2022 Eval type EVALUATION

Dog was at the front of the kennel when handlers approached, jumped up on gate, soft, wiggly body. Pawed at leashing, walked out to yard once leashed, pulled off/on. Jumped up on handlers frequently, mouthy at times, did not settle. Explored yard with kennel mate, playful initially, quickly grew overstimulated and began to bite at kennel mate, did not listen to correction from kennel mate and started a scuffle. Easy to separate when handlers picked up leashes, walked back to kennel without issue, allowed leash removal. Kennel mate moved to separate kennel.

Eval date 10/17/2022 Eval type WALK

Per volunteer - Sheldon was eager to get out & was an easy kennel pull. Once outside he was trotting along eagerly when suddenly he whirled around & jumped up on me quite forcefully. I told him "NO" in a stern voice so he will not turn off a potential adopter. (It is probably a leftover puppy behavior that is unacceptable once you're an adult and he is a year old.) I also think he was trying to escape & gallop around on his own. On a positive note, he LOVED chasing a tossed tennis ball in the play yard. On our way back he pulled pretty strongly toward a passing dog he saw in the parking lot, but no barking or whining was seen. He re-entered his kennel with no issue.
