**Any evaluations, assessments, or staff observations will print below.**

Eval date 10/11/2022                      Eval type INTAKE ASSESSMENT

Walked onto ramp on leash. Allowed all handling and vaccinated with light restraint. Loose body. Soft tail wags. Solicits attention. Walked to kennel on leash.

Eval date 10/15/2022                      Eval type EVALUATION

# Information for Animal ID # A4799187

Canine was laying on bed, slowly rose, came to door, jumped up on door once; grabbed leash while leashing, but handler pulled leash out without much resistance. Handler attempted leashing again without issue; canine walked out calmly. Canine explored yard, allowed petting with wagging tail; leaned into petting; solicited attention by coming to handler frequently. Handler removed leash in yard without issue; handler was able to release in yard without issue. Canine sat for treats; took treats gently. Canine was stop and go around barking dogs on walk back to kennel; no issues returning.

Eval date 10/26/2022                      Eval type OBSERVATION

per volunteer- volunteer attempted to pull dog from back. dog grabbed leash and continued pulling on and biting leash. volunteer stopped and alerted staff. dog has been orange carded.

Eval date 10/26/2022                      Eval type EVALUATION

Dog was closed to inside for cleaning. Soft body, relaxed wagging tail. Handler held kennel door mostly closed, and put one hand into kennel with leash loop - dog immediately grabbed loop with mouth, pulled backwards hard. Handler let go of leash, quickly put second leash loop into kennel - dog dropped original leash, grabbed handler's arm, immediately released, then grabbed second leash, pulled hard backwards. Handler let go of second leash and re-closed kennel. Original leash had fallen partially out of kennel, so handler retrieved. Held kennel door closed with knee and offered dog treats with one hand. While dog ate treats, able to quickly lasso dog with other hand. Dog readily exited kennel, moderate pull out of wing and to yard. In yard, explored, jumped up repeatedly at handler, mouthy. Settled slightly over time, allowed slow petting, then would become overstimulated again and begin to jump up repeatedly at handler, mouthy, grabbing at handler's hands/arms and treat pouch. Handler stepped on leash to prevent further jumping/mouthing. Allowed handler to place clip lead, moderate pull back to kennel. Pulled backwards at kennel entrance, thrashing. Handler guided dog halfway into kennel with firm leash pressure, then needed to boost dog the rest of the way into the kennel. Able to slowly reach in and remove leash (did not use clip lead).

Eval date 10/28/2022                      Eval type OBSERVATION

laying in bed, calm

Eval date 10/29/2022                      Eval type OBSERVATION

Canine was observed relaxing on kuranda (2 people in wing, quiet)

Eval date 10/30/2022                      Eval type OBSERVATION

rounds - observed dog resting in kennel
