

Information for Animal ID # A4801250

Animal ID #: A4801250 **Species:** DOG **Sex:** Neutered Male **Age:** 2 Yrs. Months
Name: GEMINI **Breed:** Primary- GERM SHEPHERD Secondary- ROTTWEILER
Color: Primary- BLACK Secondary- TAN

If animal has been impounded, kennel intake and outcome information will be printed below.

Kennel #: E208 **Status:** WAIT RELS **Intake Type:** STRAY **Intake Subtype:** FIELD
Location Impounded/Found: [REDACTED] **City:** [REDACTED]
Intake Date: 10/17/22 **Intake Time:** 11:23 am **Release Date:** 10/20/22
Outcome Type: EUTH **Outcome Subtype:** DIS-MED **Condition:** \$25
Outcome Date: 11/2/22 **Outcome Time:** 5:57 pm

Below is the information on the person that called about or brought in the animal.

Person ID #: [REDACTED] **Name:** [REDACTED] [REDACTED]
Address: [REDACTED] [REDACTED] [REDACTED] **Apt/Space:** [REDACTED]
City: [REDACTED] **State:** [REDACTED] **Zip Code:** [REDACTED] **Phone:** [REDACTED] [REDACTED]

If the animal was adopted, returned or sent to a New Hope group, the information will print below.

Person ID #: [REDACTED] **Name:** [REDACTED]
Address: [REDACTED] **Apt/Space:** [REDACTED]
City: [REDACTED] **State:** [REDACTED] **Zip Code:** [REDACTED] **Phone:** [REDACTED]

If the animal is licensed, tag and vaccination information will print below.

Tag Number: NO CURRENT TAG **Vacc Date:** 10/28/2022 12:00:00AM **Vacc Exp Date:** 10/28/2023 12:00:00AM

Any medical information, treatments or medication will print below.

Abbreviated examination due to potentially infectious symptoms.

General appearance/attitude: BAR, active

Information for Animal ID # A4801250

BCS: 4/9
Respiratory: hacking cough
Ocular: NSF
GI: food bowl is empty, 1 normally formed stool

Assessment:
- Coughing - suspect CIRDC, R/O other

Plan/treatment:
- Doxycycline 100 mg - 3 tab PO SID x 14 days
- Recheck respiratory clinical signs at end of treatment course
- Monitor for changes to p's condition
- Adopter to follow up with rdvm regarding overall health, baseline labwork, and long term preventative health care plan

10/24/2022 DOXYCYCLINE 100
10/24/2022 FOLLOWUP 14 DAYS

11/01/2022 DIAGNOSTICS UNHEALTHY/UNT/UNM

11/01/22 18:25

MOLECULAR DIAGNOSTICS

TEST RESULT UNITS

Canine Distemper Virus RealPCR c POSITIVE

CDV Quantity d 2109 THOUS/SWAB

Fold Difference From Cutoff 20.10

CDV WILDTYPE INFECTION

The CDV viral load is high, well above the levels seen with vaccine interference. The positive CDV PCR result is most likely caused by a wildtype strain and indicates infection.

CDV Interpretation

Bordetella bronchiseptica RealPCR POSITIVE

Canine Adenovirus Type 2 RealPCR POSITIVE

Canine Herpesvirus Type 1 RealPCR NEGATIVE

Canine Parainfluenza Virus RealPCR NEGATIVE

Canine Respiratory Coronavirus RealPCR e POSITIVE

H3N2 Influenza Virus RealPCR NEGATIVE

Influenza A Virus RealPCR NEGATIVE

Mycoplasma cynos RealPCR POSITIVE

Strep. equi subsp zooepidemicus RealPCR NEGATIVE

Canine Pneumovirus RealPCR POSITIVE

BAR, sitting at back of kennel. BCS 3.5/9. Frequent, hacking cough with mucoid nasal discharge. Unable to assess appetite due to AM cleaning. Recommend adding in Enrofloxacin. Recheck as scheduled on 11/8.

1. Enrofloxacin 136 mg - 1 tab PO SID x 7 days

11/01/2022

ENROFLOXACIN 136

11/02/2022 EXAM EVALUATION NEEDED

Not eating when I offered foods and appeared dull

Any memos will print below.

M22-621789 A4801250 11/2/2022 E DOCS

Purpose: To verify all available data is reviewed and standardized processes are followed before an animal is euthanized.

Procedure: This form is to be completed by the medical team to verify and collect critical medical data.

CLINIC PROTOCOLS FOR IRREDEMIABLY SUFFERING ANIMALS

Animals that are suffering and actively dying (e.g. agonal/comatose) may be euthanized immediately upon receiving approval from

two veterinarians. Checklist to be completed following the procedure, with explanation.

Veterinarian 1: DVM

Veterinarian 2: DVM

Explanation: positive for wild type distemper virus

Urgent Medical Issues: Confirm each item with (Y/N/NA) before proceeding:

Seizures: N Uncontrollable Pain: N Difficulty Breathing: N Active and/or Uncontrollable Hemorrhaging: N Lack of Deep Pain: N Other:

Other Medical Considerations Confirm each item with (Y/N/NA) before proceeding:

Needing intervention and rehab consideration, long term care: Y

Established Prognosis: Y- poor

Have time and resources to treat: N

Have room and resources for follow up care: N

Dog is candidate for foster: N

Rescue or NH will take once stable: N

Outside funding Available: N Details:

Any evaluations, assessments, or staff observations will print below.

Eval date 10/17/2022 Eval type OBSERVATION

Allowed leash placement, once on leash started pulling away from handler and sitting, reared up on hind legs when light pressure placed on leash, tail tucked, stiff body, tolerated petting, carried to truck kennel

Eval date 10/17/2022 Eval type INTAKE ASSESSMENT

tail tucked, stiff body, allowed vaccines, carried to kennel

Eval date 10/19/2022 Eval type EVALUATION

Met dog at rear of kennel. On approach, dog had a tense body and low ears; Gaze would dart to and away from me rapidly. Was able to crack gate and leash canine, but on leash placement canine pancaked in the kennel. Would not move out of kennel. With some coaxing and leash pressure canine walked out slowly but pancaked again. Due to ACO's moving dogs off transport at time, carried canine out of wing and out of hallway. Co-worker got the bucket and dog was transported to yard in bucket. Once in the yard, I allowed the dog to roam freely dragging leash. Canine kept a tense, slow body in the yard; tail tucked and ears flat; Wide eyes. Canine wouldn't approach handler freely; Would pancake when handler approached. Moved dog back into bucket for return.

Eval date 10/21/2022 Eval type EVALUATION

Canine was inside when handler approached back of kennel; canine ran out to gate and had a soft body, eyes, and light wagging tail; took treats through gate; retreated inside when handler cracked gate and presented leash; canine had a fast wagging tail, open mouth and soft eyes, but whole not come forward; handler was able to step into kennel and lasso canine overhead; once leashed, canine walked out of kennel and slowly down wing; once out of wing, canine sat and would not move forward with treats or verbal coaxing; handler braced with leash in front, facing intended direction and started moving forward; canine initially resisted by pulling backward, but quickly changed course and began walking forward; canine made his way all the way to the yard; slowly entered with crouched body and slightly tucked tail; in yard ran around the perimeter a bit; got into pool; saw dogs on wither side of yard and ran over with soft body, just watching; eventually stood up and began whining toward another male dog; handler was able to call canine over; canine army crawled to handler and allowed petting; leash was recovered and canine walked with handler back to kennel; resisted entering, by planting feet, so handler stepped in and canine followed; attempted to run inside, so handler used leash to get canine to turn around and was able remove leash without issue.
