

Ozone pollution is more prevalent in the warmer months of April through September. A small commitment at least one day a week helps reduce ground-level ozone pollution and helps us all breathe easier.

PROMOTE REMOTE

Teleworking helps reduce the number of vehicles on the road. Less driving reduces vehicle emissions.

CARPOOL

Carpool to as many locations as possible. Riding together decreases the amount of emissions in the air.

BIKE

Ride your bicycle to places you would normally drive your car. Enjoy some fresh air and save gas while reducing air pollution.

WALK

Reducing air pollution can be as easy as walking to nearby locations instead of driving. Increase the number of steps on your pedometer and improve your health.

RIDE PUBLIC TRANSIT

Utilize alternate modes of transportation. Consider taking the light rail, bus, or vanpool.

FUEL AFTER DARK

Hot temperatures and gasoline fumes create ground-level ozone. Reduce the effect by refueling your vehicle at night time.

AVOID IDLING

Avoid the drive-thru and go inside to order your food, coffee, or prescriptions. You won't have to wait in a long drive-thru line and you will reduce exhaust emissions.

SWEEP IT UP

Sweep your driveway, patio, deck, etc. instead of using a leaf blower. Burn a few calories while reducing air pollution.
