6. **Explanation of the rule, including the department’s reasons for initiating the rulemaking:**

**Background:**

The Maricopa County Air Quality Department (department) incorporated by reference various federal regulations and documents promulgated by the U.S. Environmental Protection Agency (EPA) and published in the Federal Register. The rule amendments in this “Notice of Final Rulemaking” implemented federal requirements according to each federal program identified or applicable source type subject to these regulations. The rule amendments incorporated by reference actions relating to New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP), Acid Rain and other parts of Title 40 of the Code of Federal Regulations (CFR). The amendments implemented federal requirements according to each federal program identified or applicable source type subject to these regulations. The rulemaking amended the incorporation by reference date from July 1, 2015, to July 1, 2016, in each of the rules to remain current with federal regulations. The adoption of the amendments to Maricopa County Air Pollution Control Regulations Rules 321, 360, 370, 371 and Appendix G was necessary prior to requesting the EPA’s delegation of authority to the department for the implementation and enforcement of the federal regulations and documents.

In addition, the amendments corrected typographical or other clerical errors; made minor grammatical changes to improve readability or clarity; modified the format, numbering, order, capitalization, punctuation, or syntax of certain text to increase standardization within and among rules; or made various other minor changes of a purely editorial nature. As these amendments did not alter the sense, meaning, or effect of the rule, they are not described in detail here, but can be readily discerned in the “strikeout and underline” version of the rule contained in Item #17 of this notice.

**Issues Raised and Discussed During This Rulemaking Process:**

In the Notice of Expedited Rulemaking (22 A.A.R. 1958, July 29, 2016), the department proposed revising Appendix G in order to clarify the subparts and test methods that are incorporated by reference in Appendix G. The revisions to Appendix G were substantially identical to the applicable code of federal regulations to which they apply. The revisions provided clarity in the identification of the applicable part and appendices that were
incorporated by reference. In addition, the revisions removed appendices that the department does not have authority to regulate. No comments were received by the department concerning these revisions to Appendix G.

**Significant Amendments Common to Rules 321, 360, 370, 371 and Appendix G:**
- Amended the incorporation by reference date from “July 1, 2015”, to “July 1, 2016”.
- Added the title of the associated subparts.
- Revised and clarified the availability of information section of each rule.

**Significant Amendments to Rule 321 (Municipal Solid Waste Landfills):**
The incorporation by reference is substantially identical to 40 CFR 60, Subpart WWW.

**Significant Amendments to Rule 360 (New Source Performance Standards):**
This incorporation by reference is substantially identical to 40 CFR 60, Subparts A, Da, F, J, Ja, T, U, V, W, X, CCCC, DDDD, KKKK, and OOOO. Updates to the federal NSPS regulations at 40 CFR 60 are incorporated by reference as of July 1, 2016, and no future editions or amendments.

**Significant Amendments to Rule 370 (Federal Hazardous Air Pollutant Program):**
This incorporation by reference is substantially identical to 40 CFR 63 Subparts A, Y, AA, BB, CC, GG, LL, DDD, LLL, RRR, UUU, DDDDD, JJJJJ, KKKKK, and UUUUU. Updates to the federal NESHAP regulations at 40 CFR 61 and 40 CFR 63 are incorporated by reference as of July 1, 2016, and no future editions or amendments.

Updates to the federal Acid Rain regulations at 40 CFR 72, 74, 75 and 76 are incorporated by reference as of July 1, 2016, and no future editions or amendments.

**Appendix G (Incorporated Materials):**
This incorporation by reference updated specific sections in the CFR. The amendments to Appendix G are substantially identical to 40 CFR 50 with Appendix D; 40 CFR 51 Subpart I; 40 CFR 52; 40 CFR 53 with Subparts A, B, and C; 40 CFR 58, Subparts B, F and G and Appendix G; 40 CFR 60, Appendixes A, B, and F; and 40 CFR 63, Appendix A.

**A.R.S. § 49-471.08(A)(2):**
Written finding by the Control Officer setting forth the reasons why the rule or ordinance making is necessary and does not alter the sense, meaning or effect of the federal or state rule or law from which it is derived. This rulemaking is required to update the applicability dates in these rules. It incorporates subparts that have been passed by the federal government which are required to be implemented by the department. Rules 321, 360, 370, 371, and Appendix G do not alter the sense, meaning or effect of the state rules and federal regulations from which they are derived, as they incorporate language that is essentially the same as the state's applicable rules and the federal code of regulations.

**A.R.S. § 49-471.08(A)(3):**

Demonstration that fees established in the rule or ordinance do not exceed limits specified in § 49-112. Rules 321, 360, 370, 371, and Appendix G do not establish fees. Any costs associated with these rules will come from permit application fees for sources obtaining a permit revision to reflect new emission limits, due to applicability of a new standard. Therefore, fees associated with these rules will be exactly the same as fees associated with similar permits and would not exceed any limits specified in § 49-112.

8. **Reference to any study relevant to the rule that the department reviewed and either proposes to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

Rules 321, 360, 370, 371, and Appendix G do not establish fees. Any costs associated with these rules will come from permit application fees for sources obtaining a permit revision to reflect new emission limits, due to applicability of a new federal standard. Therefore, fees associated with these rules will be exactly the same as fees associated with similar permits and would not exceed any limits specified in § 49-112.

9. **Showing of good cause why the rule is necessary to promote a statewide interest if the rule will diminish a previous grant of authority of a political subdivision:**

Not applicable

10. **Summary of the economic, small business, and consumer impact:**

The department incorporated by reference the following federal regulations and documents promulgated by the EPA and published in the Federal Register: New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP), Acid Rain and other parts of Title 40 Code of Federal Regulations. These amendments should not have an economic impact on businesses in Maricopa County and
should not impose additional costs on the regulated community, small businesses, political subdivisions, and members of the public beyond that already incurred by reason of federal or state rule or law. The costs of compliance with these rules have already occurred and were considered when the federal and state rule or law was proposed and adopted.

B. The following applies for all listings above which contain the word "compounds" or are glycol ethers: unless otherwise specified, these listings are defined as including any unique chemical substance that contains the named chemical (i.e., antimony, arsenic, etc.) as part of that chemical’s infrastructure.

[1] X’CN where X = H’ or any other group where a formal dissociation may occur (e.g. KCN or Ca(CN)2).

[2] a. Includes mono- and di- ethers of ethylene glycol, diethylene glycol, and triethylene glycol R-(OCH2CH2)n-OR’ where:
   n = 1, 2, or 3;
   R = alkyl C7 or less; or
   R = phenyl or alkyl substituted phenyl;
   R’ = H or alkyl C7 or less; or
   OR’ consisting of carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate.

b. Glycol ethers do not include ethylene glycol monobutyl ether (EGBE, 2-Butoxyethanol) (CAS No. 111-76-2).

[3] Includes mineral fiber emissions from facilities manufacturing or processing glass, rock, or slag fibers (or other mineral derived fibers) of average diameter one micrometer or less.

[4] Includes organic compounds which have more than one benzene ring and which have a boiling point greater than or equal to 212 °F (100 °C).
