

Sterilization, also known as spaying and neutering, is a quick and easy surgery that veterinarians perform on dogs, cats and rabbits, so that they don't have any more babies.

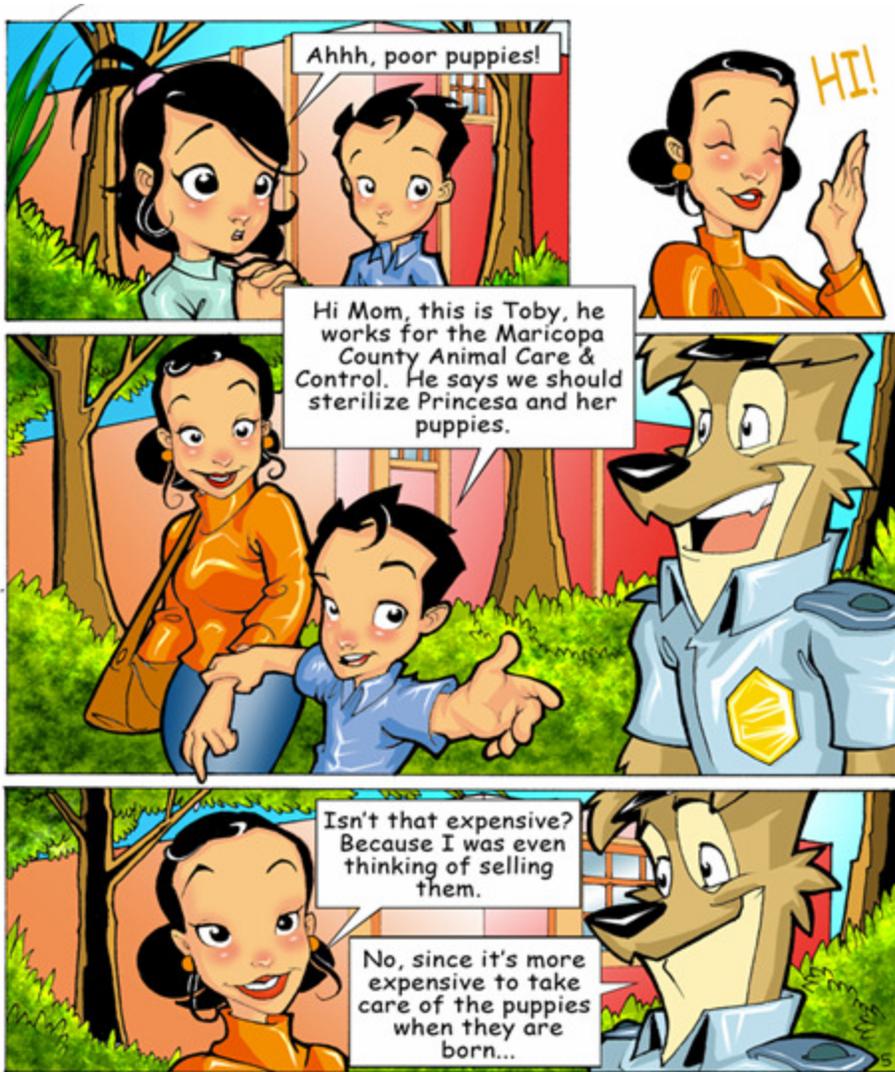

And why do they need to do that?

Maricopa County Animal Care & Control has several programs to help people get their pets sterilized and vaccinated at very low cost and sometimes even free.

Great!
We will go there as soon as possible.

Mom, what will happen to the rest of the puppies?

Your Uncle will take two, but we still need to find a home for the other ones.

As you can see kids, it's not easy finding homes for all puppies, and that is why it is so important to prevent this from happening again by sterilizing all your pets.

Thank you Toby for helping my friend Juan!

You're welcome Lupita, now let's go meet the puppies

Bring this booklet to your closest Maricopa County Animal Care & Control center and receive a discount for the sterilization of your pet.
