

Briefing Notification to County Manager

Prepared by the Maricopa County Air Quality Department

Case #/Title: AQ-2013-001-Rule 316

Supervisor Districts: All Districts

Overview: Revisions being proposed to Rule 316 (Nonmetallic Mineral Processing) will clarify and enhance the enforceability of emission limitations and work practices. Sources subject to Rule 316 include sand and gravel operations, concrete batch plants, block manufacturers, product transfer operations, landscape yards, and inert landfills.

The department anticipates significant stakeholder involvement, especially from the Arizona Rock Products Association (ARPA); however, the department does not anticipate significant conflict with stakeholders due to previous stakeholder outreach concerning necessary revisions and improvements to Rule 316.

Next Steps: Tentative County stakeholder workshop/public workshop – February 21, 2013.

Tentative Board of Health public meeting to initiate regulatory change – April 22, 2013.

Rulemaking will follow Enhanced Regulatory Outreach policy and workflow process.
