

## Report to the Board of Health To Initiate Regulatory Change

Prepared by the Maricopa County Environmental Services Department

Environmental Services  
Department

---

<b>Case #/Title:</b>	ES-2014-003/Food Service Worker Certification
<b>Meeting Date:</b>	October 27, 2014
<b>Supervisor Districts:</b>	All Districts
<b>Applicant:</b>	Department
<b>Request:</b>	This revision proposal aligns Maricopa County Environmental Health Code (MCEHC) Chapter VII with the recently enacted <a href="#">A.R.S. § 11-269.12</a> .
<b>Support/Opposition:</b>	<p>MCESD received comments from 217 stakeholders via the Enhanced Regulatory Outreach Program (EROP) website and other means: 207 expressed support, 7 opposed, and 3 stated their opinion as other.</p> <p>Seven stakeholders attended the September 22, 2014 stakeholder workshop. None of the attendees voiced their support or opposition for the Food Service Worker Certification revision.</p> <p>Six stakeholders attended the October 7, 2014 follow-up stakeholder workshop. None of the attendees voiced their support or opposition for the Food Service Worker Certification revision.</p>
<b>Department Recommendation:</b>	Staff recommends the Board of Health approve <b>initiation</b> of the proposed revision to the MCEHC.
<b>Discussion:</b>	<p>Requested changes to MCEHC Chapter VII align with the recently enacted A.R.S. § 11-269.12. This statute allows for food service worker training and certification by accredited entities, and the requirement to accept other Arizona counties certificate or identification card.</p> <p>This proposed regulatory change is following the EROP policy and workflow process and no fee changes are requested.</p> <p>In accordance with the Maricopa County Resolution, "Moratorium on Increased Regulatory Burdens", the County Manager authorized the Department to proceed with this case in August 2014.</p>

Re: County Manager Approval- Enhanced Regulatory Outreach Process (EROP)  
Case ES-2014-003/Food Service Worker Certification

In accordance with the Maricopa County Resolution, "Moratorium on Increased Regulatory Burdens," the Environmental Services Department (Department) is seeking your approval to proceed with EROP ES-2014-003/Food Service Worker Certification. This proposal qualifies for the County Manager approval under the moratorium "to comply with a federal statutory or regulatory requirement or a state statutory requirement."

The requested changes to MCEHC Chapter VII align with the recently enacted A.R.S. § 11-269.12. This statute allows for food service worker training and certification by accredited entities, and the requirement to accept other Arizona counties certificate or identification card.

This proposal is following the EROP policy and workflow process and no fee changes are requested.

We are requesting your approval to move this proposed revision forward in accordance with the Maricopa County Resolution, "Moratorium on Increased Regulatory Burdens."

Approved by Tom Manos, County Manager

MARICOPA COUNTY ENVIRONMENTAL HEALTH CODE

CHAPTER VII

**FOOD SERVICE WORKERS EMPLOYEES/CERTIFIED FOOD PROTECTION MANAGERS**

**REGULATION 1. Definitions**

- a. ~~“Food Service Manager”~~ **“CERTIFIED FOOD PROTECTION MANAGER”** means any person who supervises/trains a food **EMPLOYEE** ~~service worker(s)~~ to follow all food safety regulations (Chapter VII and Chapter VIII). The manager shall be a full time employee of the individually permitted food establishment where employed.
- b. ~~“Food Service Manager Card”~~ **“CERTIFIED FOOD PROTECTION MANAGER CARD”** means a document issued by the Department certifying that an individual has fulfilled the requirements to work as a ~~Food Service Manager~~ **CERTIFIED FOOD PROTECTION MANAGER**.
- c. ~~“Food Service Worker”~~ **“FOOD EMPLOYEE” SHALL HAVE THE SAME MEANING AS ARS §11-269.12 FOOD HANDLER, AND** means any person who handles, prepares, serves, sells or gives away food for consumption by persons other than his or her immediate family, or who handles utensils and equipment appurtenant thereto. The term does not include persons in establishments regulated under this code who handle food or drink exclusively in closed crates, cartons, packages, bottles or similar containers in which no portion of the food or drink is exposed to contamination through such handling.
- d. ~~“Food Service Worker Card” means a document issued by the Department certifying that an individual has fulfilled the requirements to work as a food service worker.~~
- D e. **“Limited Use Food EMPLOYEE CERTIFICATE Card”** means a document issued by the Department certifying that an individual with a disability has fulfilled the requirements to perform specific low public health risk activities.
- E. **"PERSON IN CHARGE" MEANS THE INDIVIDUAL PRESENT AT A FOOD ESTABLISHMENT WHO IS RESPONSIBLE FOR THE OPERATION AT THE TIME OF INSPECTION.**
- F. **“FEE WAIVED FOOD EMPLOYEE CERTIFICATE” MEANS A DOCUMENT ISSUED BY THE DEPARTMENT CERTIFYING THAT AN INDIVIDUAL WORKING UNDER A MARICOPA COUNTY BOARD OF**

**HEALTH FEE WAIVER HAS FULFILLED THE TRAINING REQUIREMENTS.**

**REGULATION 2. ~~Display of Food Service Worker/Manager Cards~~ PERSON IN CHARGE AND CERTIFIED FOOD PROTECTION MANAGER**

~~Each food establishment shall maintain on its premises a separate file containing the food service worker cards and food service manager cards for each food service worker and food service manager. This file shall be accessible to the Environmental Health Officer for review upon request.~~

- A. THE PERSON IN CHARGE OF A FOOD ESTABLISHMENT SHALL ENSURE FOOD EMPLOYEE(S) ARE TRAINED ON FOODBORNE DISEASE PREVENTION IN ACCORDANCE WITH CHAPTER VIII, SECTION 2 OF THE MARICOPA COUNTY ENVIRONMENTAL HEALTH CODE, WITHIN 30 DAYS OF PERFORMING ANY FOOD EMPLOYEE ACTIVITY.**
- B. THE PERSON IN CHARGE OF A TEMPORARY FOOD ESTABLISHMENT, SEASONAL FOOD ESTABLISHMENT, OR SPECIAL EVENT FOOD ESTABLISHMENT SHALL ENSURE FOOD EMPLOYEE(S) ARE TRAINED ON FOODBORNE DISEASE PREVENTION IN ACCORDANCE WITH CHAPTER VIII, SECTION 2 OF THE MARICOPA COUNTY ENVIRONMENTAL HEALTH CODE, PRIOR TO THE START OF THE EVENT.**
- C. A VALID FOOD EMPLOYEE CERTIFICATE OR IDENTIFICATION CARD AS DESCRIBED IN REGULATION 4 OF THIS CHAPTER, MAY SERVE AS DOCUMENTATION OF TRAINING.**
- D. EACH FOOD ESTABLISHMENT SHALL MAINTAIN ON ITS PREMISES A SEPARATE FILE CONTAINING FOOD EMPLOYEE TRAINING DOCUMENTATION.**
- E. EACH FOOD ESTABLISHMENT SHALL HAVE AT LEAST ONE (1) CERTIFIED FOOD PROTECTION MANAGER ON STAFF, WHO IS EITHER PHYSICALLY PRESENT OR AVAILABLE BY ELECTRONIC OR TELEPHONIC MEANS WHENEVER THE FOOD ESTABLISHMENT IS IN OPERATION.**
- F. EACH FOOD ESTABLISHMENT SHALL REPLACE THE CERTIFIED FOOD PROTECTION MANAGER WITHIN NINETY (90) DAYS OF SEPARATION.**
- G. A CERTIFIED FOOD PROTECTION MANAGER SHALL OBTAIN A CERTIFIED FOOD PROTECTION MANAGER CARD FROM THE**

**DEPARTMENT AFTER SUCCESSFUL COMPLETION OF A TEST FROM A FOOD PROTECTION MANAGER CERTIFICATION PROGRAM AS DESCRIBED IN THE 2013 FDA FOOD CODE, § 2-102.20. A CERTIFIED FOOD PROTECTION MANAGER CARD SHALL EXPIRE FIVE (5) YEARS FROM THE DATE OF SUCCESSFUL COMPLETION OF A CERTIFIED FOOD PROTECTION MANAGER TEST.**

**REGULATION 3 ~~Limited Use Food Service Worker Cards~~ FOOD EMPLOYEE CERTIFICATES**

~~The Department may issue a Limited Use card when requested to reasonably accommodate a person with a disability.~~

**THE DEPARTMENT MAY ISSUE THE FOLLOWING FOOD EMPLOYEE CERTIFICATES:**

**A. A LIMITED USE FOOD EMPLOYEE CERTIFICATE MAY BE ISSUED TO REASONABLY ACCOMMODATE A PERSON WITH A DISABILITY.**

~~a.1. A person with a Limited Use Food EMPLOYEE Service Worker CERTIFICATE Card shall be under direct supervision of the food establishment's CERTIFIED Food Service PROTECTION Manager at all times when handling food or food contact surfaces.~~

~~b.2. The food establishment's CERTIFIED Food Service PROTECTION Manager shall be responsible for all Limited Use Food EMPLOYEE Service Worker CERTIFICATE Card applicants, and for requesting a Department onsite visit to have the Department officially document any training and to witness the applicant's associated functions and duties assigned by the CERTIFIED Food Service PROTECTION Manager.~~

~~e.3. Upon Department approval, the applicant will receive written authorization to have a Limited Use Food EMPLOYEE Service Worker Card CERTIFICATE. issued at the Department's offices with proof of lawful presence in accordance with Arizona State Statute (A.R.S.§41-1080).~~

~~d. The Limited Use Food Service Worker Card shall expire three years from the date of issue and the fee is the same as listed in Chapter I of this code for Food Service Worker Cards.~~

~~e. Applicants may have a Limited Use Food Service Worker Card reissued by following Paragraphs 1. a. through d. 3. of this Regulation 3.A.~~

**B. A FEE WAIVED FOOD EMPLOYEE CERTIFICATE MAY BE ISSUED TO:**

- 1. A FOOD EMPLOYEE FOR WHICH MARICOPA COUNTY BOARD OF HEALTH HAS WAIVED PAYMENT OF ASSOCIATED FEES DUE TO THEIR CHARITABLE OR NONPROFIT STATUS.**
- 2. A FOOD EMPLOYEE ENROLLED IN A K-12 CULINARY ARTS SCHOOL PROGRAM OR OTHER SIMILAR CURRICULUM BASED PROGRAMS FOR WHICH MARICOPA COUNTY BOARD OF HEALTH HAS WAIVED PAYMENT OF ASSOCIATED FEES.**

**REGULATION 4. ~~Food Service Manager Training~~ FOOD EMPLOYEE TRAINING DOCUMENTATION**

- ~~a. All food service managers shall obtain a food service manager card by completing a food service manager sanitation test certified by an ANSI accredited organization meeting the Conference for Food Protection accreditation standard. The certificate, diploma, or credential obtained there from shall be presented to the Department for issuance of a food service manager card. A food service manager card shall not be issued until the food service manager card fee established by Chapter I of this code is received by the Department. All food service manager cards issued under this subsection shall expire five (5) years from the date of issue of the certification, diploma, or credential presented.~~

**A. FOOD EMPLOYEE TRAINING DOCUMENTATION MAY BE SHOWN BY THE FOLLOWING:**

- 1. A VALID FOOD EMPLOYEE CERTIFICATE, OR IDENTIFICATION CARD, ISSUED BY ANOTHER COUNTY WITHIN THE STATE OF ARIZONA; OR**
- 2. A VALID FOOD EMPLOYEE CERTIFICATE OF SUCCESSFUL COMPLETION OF A FOOD HANDLER TRAINING COURSE GIVEN BY THE DEPARTMENT; OR**
- 3. A VALID FOOD EMPLOYEE CERTIFICATE OF SUCCESSFUL COMPLETION OF A THIRD PARTY FOOD HANDLER TRAINING COURSE THAT MEETS ALL STATE OF ARIZONA STATUTORY REQUIREMENTS, INCLUDING COMPLIANCE WITH THE AMERICAN NATIONAL STANDARDS INSTITUTE/ASTM INTERNATIONAL STANDARD E2659-09.**

- B. A CERTIFICATE ISSUED UNDER PARAGRAPHS 2 AND 3 OF REGULATION 4 SHALL EXPIRE THREE (3) YEARS FROM THE DATE OF ISSUE.**

**~~REGULATION 5. Food Service Worker Training~~**

- a. ~~Except as specified in paragraph b of this Section, within thirty (30) days of performing any food service worker activity, all food service workers shall obtain a food service worker card by completing a food service worker sanitation course or test given by the Department, or show evidence of having completed a substantially similar course or test sponsored or accredited by the Department. The food service worker exam or class fee established by Chapter I of this code shall be paid prior to the initiation of the test or sanitation course. All food service worker cards issued under this subparagraph shall expire three (3) years from the date of issue. A food service worker card shall not be issued until the food service worker card fee established by Chapter I of this Environmental Health Code is received by the Department.~~
- b. ~~Temporary food establishment, seasonal food establishment, and special event food establishment food service workers shall obtain a food service worker card prior to the start of the event.~~

**~~REGULATION 6. Food Service Manager's Duty~~**

- a. ~~All food establishment locations shall have at least one (1) certified food service manager on staff, who is either physically present or available by electronic or telephonic means whenever the food establishment is in operation.~~
- b. ~~A food service establishment has ninety (90) days to replace a certified food service manager who is no longer employed at the food service establishment location.~~

**REGULATION 75. Communicable Disease**

- a. Notwithstanding any other provision in this code, should the Environmental Health Officer reasonably believe that a food **EMPLOYEE** ~~service worker~~ or **CERTIFIED** food Service **PROTECTION** manager may be a carrier of or infected with a communicable disease which can be transmitted to the public, through food, the environmental health officer shall immediately notify the Director of the Maricopa County Department of Public Health, (MCDPH) who may: (1) examine or cause the examination of the food **EMPLOYEE** ~~service worker~~, and (2) secure from the food **EMPLOYEE** ~~service worker~~ or **CERTIFIED** food Service **PROTECTION** manager appropriate specimens or fluids of body discharge and cause them to be examined at a laboratory approved

by the Director of MCDPH or by the Arizona Department Of Health Services. The Environmental Health Officer may exclude from any food service work any food **EMPLOYEE** ~~service—worker~~ or **CERTIFIED** food ~~Service~~ **PROTECTION** manager who has or demonstrates any illness or symptoms of a communicable disease that may be transmitted through food from food service work. A person so excluded shall not thereafter engage in food service work until approved by the Director of MCDPH.

- b. If required by the Director of MCDPH, a food **EMPLOYEE** ~~service—worker~~ or **CERTIFIED** food ~~Service~~ **PROTECTION** manager shall furnish such information, submit to physical examination, and submit such specimen for laboratory examination, as the MCDPH Director may require for the purpose of determining freedom from communicable disease. The failure of a food **EMPLOYEE** ~~service—worker~~ or **CERTIFIED** food ~~Service~~ **PROTECTION** manager to do so to the satisfaction of the Director of MCDPH, shall be sufficient basis for excluding the food **EMPLOYEE** ~~service—worker~~ or **CERTIFIED** food ~~Service~~ **PROTECTION** manager from such occupation.
- c. No Change

#### **REGULATION 86. Exemptions**

Any food establishment, as defined in Chapter VIII of this code, exclusively serving prepackaged foods ~~that are not potentially hazardous (time/temperature control for safety) foods~~ is exempt from Regulations ~~4 and 6~~ **2 PARAGRAPH E.** of this Chapter.

## Initial Stakeholder Meeting

**Proposed Revisions  
Maricopa County Environmental Health Code**

**CASE # ES-2014-003  
Food Service Worker Certification**

**Maricopa County Environmental Services Department  
September 22, 2014**

## Maricopa County Environmental Services Department

**Working with our community  
to ensure a safe and healthy environment**

**VISION STATEMENT:**  
As the recognized regional environmental leader, we will develop and foster innovative environmental health protection programs for the safety of our residents and their environment.

**MISSION STATEMENT:**  
The mission of the Environmental Services Department is to provide safe food, water, waste disposal and vector borne disease reduction controls to the people of Maricopa County so that they may enjoy living in a healthy and safe community.

## MARICOPA COUNTY ENHANCED REGULATORY OUTREACH PROGRAM

Maricopa County's Enhanced Regulatory Outreach Program (EROP) Departments seek to ensure the safety and well-being of our community. Because we understand that regulations and rule-making decisions, discussions, and meetings can be confusing, we have developed this website to allow citizens to easily monitor and engage in the adoption and amendment of all regulations.

**Chapter 7 Food Employees/Managers**

**ARS §11-269.12**  
Food handler training and certificate

**Chapter 7 Food Employees/Managers**

**Regulation 1. Definitions –**

**Alignment with 2009 FDA Food Code:**

Current Terms	2009 FDA Food Code terms
Food Service Manager	Certified Food Protection Manager
Food Service Manager Card	Certified Food Protection Manager Card
Food Service Worker	Food Employee

- Define "Person In Charge"

**Chapter 7 Food Employees/Managers**

**Regulation 1. Definitions –**

**Fee Waived Food Employee Certificate:**  
*means a document issued by the department certifying that an individual working under a Maricopa County Board of Health fee waiver has fulfilled the training requirements.*

**Limited Use Food Employee Certificate:**  
*means a document issued by the Department certifying that an individual with a disability has fulfilled the requirements to perform specific low public health risk activities*

**Chapter 7 Food Employees/Managers**

**Regulation 2. Person In Charge and Certified Food Protection Manager –**

- Person in Charge shall ensure Food Employees are trained on foodborne disease prevention, per Chapter III, Section 2 of the Maricopa County Environmental Health Code within 30 days of performing Food Employee activities.
  - Temporary, seasonal, special event must train prior to event.
- Regulation 4 (Food Employee Training Documentation) may serve as documentation of this training.
- Maintain documentation of training on premises

**Chapter 7 Food Employees/Managers**

**Regulation 2. Person In Charge and Certified Food Protection Manager –**

- Each food establishment must have at least one Certified Food Protection Manager (CFPM) on staff –
  - Physically present or available by phone/electronic means while operating.
- Replace CFPM within 90 days of separation
- Department-issued card after completing approved CFPM course.
- Valid for 5 years.

**Chapter 7 Food Employees/Managers**

**Regulation 3. Food Employee Certificates –**

- Limited Use Food Employee Certificate
- Fee Waived Food Employee Certificate
  - Fee waiver from Board of Health
  - K-12 culinary arts school program with fee waiver

**Chapter 7 Food Employees/Managers**

**Regulation 4. Food Employee Training Documentation –**

Food Employee training documentation may be shown by the following:

- Valid Food Employee certificate, or identification card, issued by another county within Arizona.
- Valid Food Employee certificate of successful completion of a Department food handler training course

**Chapter 7 Food Employees/Managers**

**Regulation 4. Food Employee Training Documentation –**

Food Employee training documentation may be shown by the following:

- Valid Food Employee certificate of successful completion of third party food handler training course that meets all statutory requirements, including compliance with the American National Standards Institute/ASTM International Standard E2659-09.

Department and third party certificates expire within 3 years of issuance.

**Chapter 7 Food Employees/Managers**

**Regulation 6. Exemptions –**

Food establishments serving only prepackaged foods are not required to have a Certified Food Protection Manager on staff.

**Thank you for your participation!

## Environmental Services Department

### Stakeholder Meeting ES-2014-003 Food Service Worker Certification Monday September 22, 2014

**Stakeholders Present:** Vernon Stout – State Food Safety, Chianne Hewer – AZ Restaurant Association, Kate Piche – NRA/ServSafe, Cathy McCullough – NRA/ServSafe, Elisa Cain – NRA/ServSafe, Roberdo Angel – Albertson, Christine Ruiz – State Food Safety

**Staff Present:** John Kolman – Director Environmental Services Department, Andy Linton – Division Manager Environmental Health, Ken Conklin – Division Manager Quality & Compliance Division, Hether Krause – Environmental Operation Supervisor Quality & Compliance Division, David Morales – Supervisor Quality & Compliance Division, Joan Minichiello – Management Analyst Quality & Compliance Division, Michelle Chester – Training Officer Quality & Compliance Division, Lene Pope – Development Services Technician Quality & Compliance Division

**Presenter(s):** Hether Krause and Andy Linton

**Minutes\*:** Hether Krause started off the meeting by discussing the [Enhanced Regulatory Outreach Program](#) (EROP) and the updated website. The EROP was put together by the Board of Supervisors (BOS) to allow for more transparency of any regulatory changes and updates. Andy Linton explained that the Food Service Worker requirements are listed in Chapter 7 of the Maricopa County Environmental Health Code (MCEHC). Recently, Arizona Legislators passed A.R.S. [§11-269.12 – Food handler training and certificate, which went into effect](#) in July 2014. The Department is proposing changes to Chapter 7 of the MCEHC to bring the requirements into alignment with the new law. A copy of the Draft Code Mockup (attached) was handed out. Some of the proposed changes also bring language and definitions into alignment with those used in the 2009 FDA Food Code. Andy Linton went over the presentation (attached) and explained the proposed revisions. One of the proposed revisions stems directly from the State Statute which is “a valid food employee certificate, or identification card issued by any County within Arizona” will now be accepted. A “valid food employee certificate of successful completion of a department food handler training, or a “valid food employee certificate of successful completion of a third party food handler training course that meets all statutory requirements, including compliance with the American National Standard Institute (ANSI)/[ASTM International Standard E2659-09](#) will also be accepted.

Questions from Stakeholders and MCESD answers:

- The certificates expire within 30 days of issuance, so you have 30 days to take that certificate to the MCESD office to get your card, so how can the certificate of course completion be valid for 3 years?
  - In Regulation 2 it talks about the “Person in charge shall ensure food employees are training on foodborne disease prevention, per chapter III, section 2 of the MCEHC within 30 days of performing food employee activities.” The language proposes that this training be conducted within 30 days of conducting food handling activities. The

person in charge may show the inspector documentation of training with any of the three options outlined in this part of the regulation.

- So the employees no longer need to come in to one of the MCESD offices to get the County issued card?
  - That is correct, the certificate and/or documentation of training will suffice.
- Will the MCESD be tracking who has completed training?
  - The Department may request the documentation of training during inspections.
- So it's not going to be like in the past, where you were able to track the people that completed the training?
  - Correct, food employees will no longer need to come into our office to get a card. Since we no longer will be maintaining a database with all the cards that have been issued, we will no longer have a database of food employees who have received training.

MCESD will still be issuing is the Certified Food Protection Manager's Card; they will still have to come into one of our locations to get a card.

- You mentioned that there are several statutory requirements for the food employee, can they be found somewhere other than Chapter 7, and is the 80% pass rate still the same?
  - In addition to the areas covered in the statute, we will develop a "Substantive Policy Statement" to outline the specific areas of knowledge from the FDA Food Code that have to be covered by the training.
  - There is nothing specific in the regulation on an exam's passing score; only that the food service training course meets the ANSI/ASTM standard.

**Meeting adjourned.**

\*In order for the minutes to be relevant; only those questions and comments that were applicable to the topic presented were recorded. All other questions and comments not relevant to the topic were addressed either at the time of the meeting or shortly thereafter.

### Follow-up Stakeholder Meeting ES-2014-003 Food Service Worker Certification Tuesday October 7, 2014

**Stakeholders Present:** Vernon Stout – State Food Safety, Chianne Hewer – AZ Restaurant Association, Kate Piche – NRA/ServSafe, Elisa Cain – NRA/ServSafe, Roberto Angel – Albertson, Christine Lewis – State Food Safety

**Staff Present:** Steven Goode – Deputy Director Environmental Services Department, Andy Linton – Division Manager Environmental Health, Ken Conklin – Division Manager Quality & Compliance Division, David Morales – Supervisor Quality & Compliance Division, Lene Pope – Development Services Technician Quality & Compliance Division

**Presenter(s):** Ken Conklin and Andy Linton

**Minutes\*:** Ken Conklin welcomed everyone to this follow-up stakeholder meeting, and started off the meeting by discussing the [Enhanced Regulatory Outreach Program](#) (EROP) and the updated website. The EROP was adopted by the Board of Supervisors (BOS) to allow for more transparency of any regulatory changes and updates. We welcome any comments from our stakeholders and will respond to every comment whether it be in support or in opposition of the changes. We are currently in the process of reviewing all the comments we have received so far for this case, and all of the comments will be available as part of the staff report submitted to the Board of Health (BOH) for the October 27<sup>th</sup> meeting.

Andy Linton explained that the Food Service Worker requirements are listed in Chapter 7 of the Maricopa County Environmental Health Code (MCEHC). Recently, Arizona Legislators passed A.R.S. [§11-269.12 – Food handler training and certificate, which went into effect](#) in July 2014. The Department is proposing changes to Chapter 7 of the MCEHC to bring the requirements into alignment with the new law. Some of the proposed changes also bring language and definitions into alignment with those used in the 2009 FDA Food Code. Andy Linton went over the presentation and explained the proposed revisions. One of the proposed revisions stems directly from the State Statute which is “a valid food employee certificate, or identification card issued by any County within Arizona” may now be accepted as documentation of food employee training. A “valid food employee certificate of successful completion of a department food handler training, or a “valid food employee certificate of successful completion of a third party food handler training course that meets all statutory requirements, including compliance with the American National Standard Institute (ANSI)/[ASTM International Standard E2659-09](#) may also serve as documentation of food employee training.

Questions and Comments from Stakeholders and MCESD answers:

- What is the process after the public comment period, and what is the accountability for those comments?

- We create a staff report that will be posted on the EROP website 2 weeks prior to the BOH meeting on October 27th, and all the comments will become part of that report. That staff report then gets submitted to the BOH for their feedback.
- The way Regulation 4 is written doesn't say that it is a County issued certificate. As we read the law, this would not be in compliance with the law, and we thought that the County was trying to bring things into compliance with the law.
  - We do understand that the way the statute is written is very broad and can be interpreted differently. For example, accreditation is mentioned but it does not provide details on what this accreditation is, although the ASTM standard is mentioned in another area of the law. Our goal is to be in compliance with the statute and to also meet what we understand to be the intent of the law.
- We think the intent of the law is to allow each County to have their program, but have some reciprocity of the cards/certificates. So if you have a card from Yavapai County that it would be recognized here in Maricopa County. The law specifically says that a County issued certificate is valid in any County, so that means it has to be County issued. By definition, County issued means either the County must give permission to another party and include the County seal on the certificate or the County must issue the certificate themselves. Currently, Maricopa County issues the cards themselves. The way the proposed code language is written says that you are giving permission to anybody to issue a certificate on your behalf as long as they are ASTM standard accredited.
  - In addition to accepting food handler cards from other counties within the State, the statute also says that we have to accept accredited food handler certificates .
- So as we read the law the County has to approve those third party providers in addition to those accredited by ASTM accreditation.
  - The statute does not provide specific information on what this accreditation is or who accredits the training program. In our research, the ANSI was the only organization providing an accreditation to ASTM standard 2659. We also saw that this accreditation is used in most California jurisdictions.
- We have some significant problems with using the ANSI accreditation standards as it is implemented in California as compared to what the law says. We are concerned about food safety.
  - The EROP process allows for stakeholders to submit comments either in support of or opposition to proposed regulatory changes and provides an opportunity for stakeholders to propose new language. Stakeholder involvement is a very important part of our code revision process. We welcome any proposed language you may have and will respond to every comment we receive. The next step in the Enhanced Regulatory Outreach Program process is the Board of Health meeting on Monday, October 27<sup>th</sup>. The BOH will have a chance to look over both the proposed language and any comments received.
- The challenge we see if Maricopa County leaves the language as it is right now, it opens up for any ASTM accredited provider to be able to come and sell training in Maricopa County, which is fine except for the County will not know who all the providers may be. But the law says that the certificate has to be issued by the County. So if you say that all providers are approved, you would need to have all those providers include a Maricopa County seal on the certificates. If you do not do that, then you have a different problem. The other Counties will not know that the providers have been accredited or have been approved in Maricopa County.
  - If Maricopa County isn't issuing or requiring the cards, there would not be a Maricopa County card that other counties would have to accept under the law's reciprocity.

- If the certificate doesn't have a County seal, how will a food manager know that this certificate is valid and was issued by a County approved provider? We propose that you would require any provider that issues a certificate in Maricopa County to include a seal.
  - We are not specifically requiring a certificate; we are requiring that the person in charge ensure all food employees are trained on the required food safety topics within 30 days of performing food employee activities.
- The program that Maricopa County currently has in place is solid, why back away and go backward? There was much of effort put into the RFP a few years ago to establish a very solid program. What is defined in that RFP is very different than what is being proposed here. It seems like the Department doesn't care about food safety as much anymore. Currently, we think that Maricopa County has one of the best food safety programs in the country, why back away from that?
  - We always keep the Department's vision and mission statements in mind when proposing new code language in order to ensure we are doing what we feel is in the best interest of the health and safety of the citizens of our community. Receiving stakeholder input is an important part of this process - all comments are appreciated and will be included in our reports to the Board of Health and Board of Supervisors. Again, we do encourage you to submit specific language for the proposed code revision.
- The NRA thinks that the proposed program will be in line with the FDA Food Code - talking about the responsibility of the person in charge. We don't think that Maricopa County is backing away; we see it as more in line with current national standards for food safety.
  - We understand that there will be differences of opinion and we respect both sides.
- I think we all agree that the training must be ANSI accredited, but it should have the health Department's seal on the certificates.
  - When new statutes are enacted, the Department always tries to do due diligence to understand the intent of the statute, this is particularly important in cases where statutes are not very specific. We feel that we did that in this case. Maintaining the highest standard of food safety remains our first priority. Our intent is not to minimize the importance of food employee training. In fact, a key component of active managerial control, which has been the focus of our program for the past few years (e.g. the Cutting Edge Program), is to ensure that food employees are trained.
- What will the economic impact for the County be?
  - We are currently not charging for the testing anymore, only for the printing of the cards. Specific information on the revenue generated from the current card printing can be provided, if desired.
- Based on the RFP from a few years ago it was \$465,000 per year, and there could be other things that could cost the County, and we would hate to see that happen. This should be something the County should think about. If you take \$465,000 out of the budget you'll probably lose some employees and that will just make it more challenging for the program and to maintain a good quality health inspection program. We would recommend that the County continues to collect the \$5 fee for cards.
- How will you be able to verify the authenticity of the certificates, to make sure that they are not mass produced? We would recommend that you have some way to verify that, like having the County seal on the certificates. That should be written into the code specifically.
  - There have been some preliminary discussions on how and when the Department will conduct audits of the proposed food employee training documentation. One of the ideas being discussed is to focus these audits on establishments where violations have occurred during the inspection. The exact procedure for auditing cards will have to be determined once the language for the new regulation is finalized. Our intent is to hold

the person in charge accountable for ensuring food employee training requirements are met.

- You mentioned that the County will issue a Substantive Policy Statement (SPS) with more details on food training, when will that become available?
  - That is something we'll be working on after this proposed case has been approved by the Board of Supervisors. Our intent would be to cover the general areas of food safety described in the statute and the food code.
- How is the proposed code language different today, than it was at the last stakeholder meeting?
  - We haven't had the opportunity to receive any new language from our stakeholders; most of the oppositions received were just expressing opinions. We would welcome any new proposed language. Any new language may not make it to this first BOH meeting, but it will be included in the information provided at the subsequent BOH meeting.
- What about the immigration issue, does the County have any concern with that?
  - Our only concern is to ensure we are in compliance with State statutes. Our focus is always on Department's mission and vision - to protect the health and safety of Maricopa County citizens.
- What other options for documentation of training are there?
  - The documentation of training can be a card or certificate issued from another County, a card issued by the Department (i.e. limited use card, fee waiver card), or a card/certificate issued by an approved third party.
- Suggestion to clarify that language a little better.
- What is the Department doing about those providers that are "selling" cards/certificates in the County right now and are not permitted to do so?
  - The Department would not consider these cards/certificates as valid.
- Does the County still have an interest in continuing to track certificates that have been issued?
  - We always evaluate how to use the limited resources we have to reduce the risk of foodborne illness in the most effective manner possible.
- The NRA cautions the County to not keep too much personal information on a database, it could get hacked.
- Everybody agrees that ASTM 2659 contains standards and requirements for security. These standards have to be met in order to receive the ANSI accreditation.

### **Meeting adjourned.**

\*In order for the minutes to be relevant; only those questions and comments that were applicable to the topic presented were recorded. All other questions and comments not relevant to the topic were addressed either at the time of the meeting or shortly thereafter.

**Comments:**

My name is Stuart Vaughn, the Director of Operations at Westaco. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

---

**Comments:**

- ServSafe supports the proposed changes to Chapter 7 of the Maricopa Food Code. - The proposed changes which provide approval for ANSI ASTM accredited food handler programs demonstrates a commitment to providing quality, best in class programs that will help protect the public health. - The change to no longer collect employee data in your county database is very smart as we are aware of many instances where state or county systems have been hacked. That type of data collection is high risk. -The proposed changes will help assure that our national and regional accounts who want consistent training are able to take the correct approved course vs. taking the wrong course that is not valid in Maricopa County.

**Comments:**

My name is Brad Cox the Director of Airport Operations at LGO Hospitality. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

**Comments:**

On behalf of the Arizona Restaurant Association, I support the proposed changes made by Maricopa County to the environmental health code regarding food employee certification. I thoroughly appreciate the proactive and inclusive approach that the health department is taking to work with the industry to understand the areas of improvement needed to ensure food safety in our state. These proposed changes will greatly impact restaurant owners with the option of high standard programs for food employee certification, and kill the lag time between the course being completed and the employee needed to make a trip to the health department and pay a fee for the card. These proposed changes work in conjunction with industry best practices, definitions, needs and responsibility of a restaurant owner and their food employees and managers.

**Comments:**

I am Robert Fitzgerald. President of White Chocolate Grill and I support the change to allow Foodservice workers to meet training demands of Maricopa County in a quicker fashion. More approved trainers is part of the free market.

**Comments:**

When we hire employees it is mandatory that they get a food card in two weeks. They generally don't get paid for two weeks, so it is, quite often, difficult for them to get it in time to comply with this rule. I think this would not only make it easier on everyone, but it would lead to more restaurants complying with regulations.

**Comments:**

It will be quicker and easier to be compliant with the Maricopa Food Code as a food employee will their certificate right after completing the course. Employees who dont drive now wont have that additional concern of getting a ride/transportation when working to be in compliance of the food code.

**Comments:**

I believe these changes would greatly impact the restaurants as it would be easier to obtain certification since there currently is only the one location and some restaurants are not located near it.

**Comments:**

I support the proposed changes by Maricopa County to the environmental health code regarding food employee certification. Training certificates should serve as documentation of training. The additional step of employees reporting to the health department with a certificate they possess and paying a fee for another card has surely been an unnecessary step in the process of compliance. Nancy Chase owner/operator Chase's Diner.

**Comments:**

My name is William Elizondo-Flowers, Ops Director for Desert De Oro Foods. I support the proposed changes by Maricopa County to the environmental health code regarding food employee certification. It will be easier and quicker to be compliant with the food code.

**Comments:**

I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

**Comments:**

My name is Brad Flahiff, the Director of Development at Barnett Management Company. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

**Comments:**

My name is [insert name], the [title] at [restaurant/company name]. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

**Comments:**

My name is David Wehrman, the VP of Operations at SWT Arizona Investments dba KFC. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

**Comments:**

This improvement to the process for our employees to quickly get certified for food handling will be a great change for our company. It will allow our employees to get certified quicker and go through the training quicker.

---

**Comments:**

My name is Joe Barnes, the General Manager at Burger King #2303. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

**Comments:**

My name is Laura Ruiz, the manager at Burger King #2303. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

**Comments:**

Please support this revision! We own and operate 24 Burger King restaurants all over Maricopa County. It is so difficult to get our food service workers down to one of the 4 centers to get their food service worker certification. Many have limited transportation, income and availability to get this done on top of multiples jobs, school, childcare, etc. We have online access in all of our locations and we provide online training for our systems so this is a natural extension of what we are already doing. We are committed to food safety and food service work training. Please provide our organization and our employees with the flexibility to get this certification online. It will save us all time and money and it will ensure that this certification gets done in a more timely manner. Thank you for your time!

---

**Comments:**

CKE is the parent company of Carl's Jr. Restaurants. We have 94 restaurants owned and operated in 13 counties in AZ (6 franchisees). 49 of those restaurants are located in Maricopa County. We support adoption of the proposed changes to Employee Food Safety Training Regulations. There is benefit for industry in allowing ANSI accredited trainings to meet requirements. The changes allow for greater flexibility and enable better compliance while retaining the intent of the regulation (employee food safety knowledge to ensure safe food handling/prevent foodborne illness).

**Comments:**

My name is Steve Lynch, the regional manager at the Four Peaks Brewing Company. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course Thank you!

**Comments:**

My name is Bill Singer, the Director of Operations at MCL Enterprises, a Franchisee of Burger King. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course In Summary, doing this just makes sense. Thank you for your consideration. -Bill

### Comments:

My name is Adam, the GM at Coconut's Fish Cafe. I support the proposed changes by the Maricopa County to the environmental health code regarding food employee certification. New Maricopa regulation revisions provide these benefits: - A food employee certificate/card from any AZ county will be recognized in Maricopa - Allowing a food employee training certificate to serve as documentation of training, instead of the current process that requires a \$5 fee and a trip to the health department to obtain a photo ID food employee card allows an establishment to train their employees in food safety without additional unnecessary expense - Allowing additional training providers to provide food employee training in Maricopa means establishments can pick the training program they prefer - More approved training providers will lead to competition which will provide food establishments with less expensive training options - It will be easier and quicker to be compliant with the Maricopa Food Code as a food employee will receive their certificate right after completing the course

Time of Request: 9/30/2014 2:57:31 PM

**Comments:**

The American National Standards Institute supports the proposed changes to the Maricopa Food Code. The approval of ANSI/ASTM E2659 accredited food employee training programs that meet the content requirements of ARS 11-269.12 will ensure that quality training programs are available to help protect the public health. All ANSI/ASTM E2659 accredited training courses and tests have been developed using best practices in instructional design and exam development. ANSI Certificate Accreditation Program (ANSI-CAP) will validate that all ANSI/ASTM E2659 accredited training providers are compliant with the state identified food safety content requirements. ANSI-CAP is based on an American National Standard, ANSI/ASTM E2659-09, Standard Practice for Certificate Programs. The standard requires that your program meets predefined industry requirements for content, follows predetermined processes, includes constant feedback for quality improvement. ANSI's accreditation process itself follows ISO/IEC 17011, the International Standard that defines quality third-party accreditation practices. ANSI is the official U.S. representative to the International Organization for Standardization (ISO) and, via the U.S. National Committee, the International Electrotechnical Commission (IEC), and is a U.S. representative to the International Accreditation Forum (IAF). ANSI accreditation is nationally and internationally recognized as a mark of quality and assures that employers can have confidence that the certificate holder has completed the prescribed course of study.

**Comments:**

H.B 2436 states that all food handler training must comply with the following: · Teach a minimum set of specifically defined training material; · The training must be ASTM 2659 Accredited; · Food handler cards have statewide reciprocity. This rule does not prevent Maricopa County from requiring training providers to submit training records to the health department. If the new rule implemented this requirement, it would allow Maricopa County to continue to maintain control over the food handler program. This would also prevent fraud as food protection managers and inspectors could look up training records to verify authenticity. Maricopa County should continue to collect a fee (current fee \$5.00); however this fee could be collected when the training provider submits the training record. Training providers could include this fee in the price of training. The fee would be used to support quality inspection programs that are currently in place. If Maricopa County loses this fee, additional fees may need to be levied on restaurant establishments or compromise food safety in the county.

Dear Scott Dastrup:

Thank you for registering your comment regarding Maricopa County Enhanced Regulatory Outreach Program (EROP) case ES-2014/Food Service Worker Certification via the EROP website.

We acknowledge your opposition to the proposed revisions to MCEHC Chapter VII to align with A.R.S. § 11.269.12 food handler training and certificate.

The Maricopa County Environmental Services Department's proposed regulation is in direct response to the requirement to comply with the recently enacted State Statute for Food Handler training and Certification. The Department welcomes stakeholders to submit their suggestions for a code proposal that enables us to fully comply with the state statute.

We appreciate your participation in the Maricopa county Environmental Services Department's efforts to develop regulations that serve our community and ensure a safe and healthy environment.

Dear Vernon Stout:

Thank you for registering your comment regarding Maricopa County Enhanced Regulatory Outreach Program (EROP) case ES-2014/Food Service Worker Certification via the EROP website.

We acknowledge your opposition to the proposed revisions to MCEHC Chapter VII to align with A.R.S. § 11.269.12 food handler training and certificate.

The proposed regulation requires that the Person in Charge of a food establishment shall ensure that food employees are trained. This concept is in line with current FDA Food Code which emphasizes the important role the Person in Charge plays in ensuring active managerial control of the food establishment. Field inspectors will verify that food employees are sufficiently trained during the inspection process. The Maricopa County Environmental Services Department will not require a “county issued” certificate or identification card for food employees. Therefore, there will be no requirement for a county logo on the provider’s certificate or the need for a database of food employees.

The Maricopa County Environmental Services Department’s proposed regulation is in direct response to the requirement to comply with the recently enacted State Statute for Food Handler training and Certification. The Department welcomes stakeholders to submit their suggestions for a code proposal that enables us to fully comply with the state statute.

We appreciate your participation in the Maricopa county Environmental Services Department’s efforts to develop regulations that serve our community and ensure a safe and healthy environment.

#### **Comments:**

In 2012, Maricopa County decided to improve the already outstanding county food handler training program. The County wanted to have consistent training given to all food workers. The updated program was implemented on September 1, 2013. This new program provides consistent training, whether the food worker takes the training online, in the classroom, or at the health department. The training was initially available in English, Spanish, Mandarin, Vietnamese, Korean, and American Sign Language; soon after Tagalog and Serbo-Croatian were made available. The program was easier to manage for the county, as they were able to utilize a single source to verify all training was genuine, preventing fraud. The proposed rule will erase all the progress that has been made in the Maricopa County training program over its history and its excellent record of accomplishment and customer satisfaction. H.B. 2436 changes the regulatory landscape, but it does not need to destroy the Maricopa County food worker program. Several changes can be made to the proposed rules which would both adhere to H.B. 2436 and sustain the intentions of the original food worker program: Require that all providers report student training records into a secure database (implemented by existing RFP provider). This database can be used to contact all food handlers via email or mail if an outbreak occurs. Verification of certificate issuance can be completed using this database by Food Protection Managers. The county can use this database as part of epidemiological investigation. Require that all certificates have a verification number printed on them that is searchable in the aforementioned database. Require a county logo and the ANSI logo be printed on all certificates. Collect a fee for every student added to the database. Enable students who come to the Health Department the ability to train and print a certificate using existing computer labs located at the Health Department buildings.

Dear Vernon Stout:

Thank you for registering your comment regarding Maricopa County Enhanced Regulatory Outreach Program (EROP) case ES-2014-003/Food Service Worker Certification via the [EROP](#) website.

Code language to initiate case ES-2014-003/Food Service Worker Certification will be provided to the Board of Health (BOH) at their October 27, 2014 meeting. Language suggestions received the week of October 13, 2014 will not be included in the October 27th BOH staff report [mockup](#).

However, these and/or other suggestions may be included in the staff report mockup for the January 26, 2015 BOH meeting, which is when BOH members may recommend to advance the case to the Board of Supervisors for consideration.

We appreciate your participation in the Maricopa County Environmental Services Department's efforts to develop regulations that serve our community and ensure a safe and healthy environment.

**Auto forwarded by a Rule**

It was requested in the stakeholders meeting on October 7 to submit possible updates to the rule that would benefit the public, the county, and any other stakeholders while still complying with H.B.

2436. I believe that adding the following phrase to the end of section 4.A.3 will provide a better service to all parties: "AND IN ACCORDANCE WITH ANY COUNTY CONTRACTS AND AS APPROVED BY THE COUNTY" (See attachment for the change in context).

Reasoning for this change:

- H.B. 2436 requires reciprocity for other counties; the requested change does nothing to change that.
- Maricopa County currently has an existing contract with StateFoodSafety.com. The requested language update will not infringe on H.B. 2436 and will also eliminate the need for the county to refund setup costs to StateFoodSafety.com.
- This change will have no long-term effect on the rule once the contract expires.
- This change adds flexibility that will enable Environmental Services to make updates to the program if they see a need without readdressing the rule.

Short-Term Ramifications of this change:

- StateFoodSafety.com will continue to be the only Maricopa provider until the contract expires on June 30, 2016, at which time the requested change will have no binding on any provider unless the county decides to enter into another agreement of its choosing.
- The county can immediately stop printing food worker cards per the rule change and section 6.12 of the contract and still be within the bounds H.B. 2436.
- All ANSI training providers can provide training to any food handler in the state so long as they are approved by a county health department within the state of Arizona per the rule regulation 4.A.1.
- Until the contract expires, inspectors will accept training certificates that are issued only by StateFoodSafety.com, another Arizona county, or an ANSI-approved representative of that health department.
- The Maricopa County website will continue to read as it currently does related to approved providers until the expiration of the agreement.

#### Comments:

Feedback for Maricopa County As a stakeholder, and upon review the proposed process change for Maricopa Food Handler Cards, I have the following thoughts for consideration – The purpose of legislation should be to strengthen local programs, not weaken them. For Maricopa County to adopt the “lowest common denominator” approach that this legislation encourages represents a weakening of public health and the ability of local programs to meet their challenges in localized, creative ways. I encourage Maricopa Environmental Health to stand strong in their commitment to their own programs, while still abiding by the law. Because Maricopa County has a long-standing food safety program, reinforced with a robust food handler training requirement, it has been recognized nationally as a strong program. Operators take seriously the requirement for food handlers to not only complete the training, but receive the appropriate card from Maricopa County. The close involvement and investment of the county strengthens food safety for all members of the Maricopa County community. I believe that this strongly reinforces the food safety culture that Maricopa County has worked hard to create. The current proposed plan weakens that commitment, both in the eyes of the operator as well as the food handler. We all know that there is no guarantee that food handlers will take seriously the food safety behaviors they are taught, but knowing that the county supports a CONSISTENT and HIGH QUALITY training program encourages that food handler to take more personal responsibility. A county based program also helps those in the field, the inspectors, to take greater ownership of the training program and feel more invested in its’ success. This is communicated in many subtle and not so subtle ways and MAKES A DIFFERENCE. Many times, as we have worked with counties transitioning from classroom training to a single provider of online training, we have heard from both operators and food handlers that there is a greater sense of team commitment as ALL individuals have received consistently presented information rather than the diversity that previously existed from one instructor to another (and which will also certainly exist between one ANSI course an another). Although the content coverage may be similar, the application of educationally sound learning principles to the presentation of content varies greatly between programs and detracts from the consistency that has proved so valuable. Although the new state law requires that training certificates from all ANSI accredited providers be accepted as valid, a county can still have more restrictive requirements. It does not state that a county cannot have a preferred provider, reinforced by having a direct link to that provider on the website. Maricopa has committed significant time and resources into the selection of the best training available, and continuing with the Maricopa Food Handler Card would serve to continue to build a strong program. Some Health Department officials have suggested that with “active managerial controls” in place, there should always be correct processes in place and a responsible food manager in charge, and this then diminishes the necessity for consistent, high quality food handler training. However, it has been repeatedly pointed out that whereas in theory the process may have merit, the carrying out of these processes needs ongoing supervision, reinforcement and correction. Most typically, there is one trained “manager” on duty in many food establishments. Where the actual manager on duty spends their time varies a great deal. This manager is pulled in many directions . . . paperwork, office work, scheduling, monitoring the front of the house, etc. Although food safety processes may be in place, the individual with managerial responsibilities will hardly be everywhere at once and nothing will replace the individual themselves having received a quality training experience

which builds a personal commitment to food safety behaviors. I strongly encourage Maricopa Environmental Health to stand strong in their commitment to the food safety training program they have invested themselves in. Remember, you are responsible for the food safety in your community. Take ownership, take pride and move forward appropriately.

**Comments:**

I think it is appropriate that whomever is evaluating the updates to the Maricopa food worker rule understands the background of AZ House Bill 2436 (HB 2436) and how it applies to the rule-making process in Maricopa County, before a rule is approved. I have worked with a food safety trainer for many years and have worked hard to provide great training to each student, so these legislative changes have had a big impact on me and my line of work. I will attempt to be brief in my explanation. In order for anyone to understand how we arrived at HB 2436 we need to go back to 2010 when Senator Padilla of California introduced CA Senate Bill 602 (SB 602) in the Legislature. The National Restaurant Association (NRA), in partnership with the California Restaurant Association (CRA), wrote that bill. Their stated intent was to have a positive impact on food safety in California. However, they neglected to tell the senator that the proposed bill (SB 602) would create a monopoly in which the NRA would gross between \$5M-\$15M per year. Based on public record, the NRA spent over \$200,000 in lobbying fees to ensure that this bill was passed by the legislature. Throughout this process, senators and representatives were assured by the NRA lobby that there were at least three organizations that could provide the training under the bill—when in reality the lobby knew that this was not a true statement (the NRA itself was the only organization that could provide training under the limitations of SB 602). The bill was signed into law on September 25, 2010. Shortly thereafter, Senator Padilla became aware of the half-truths that had caused him to introduce and promote SB 602 and immediately began work to bring an amendment bill to the legislature (CA Senate Bill 303). The senator's office, in partnership with a focus group comprising local Health Department and training industry stakeholders, worked hard to find solutions to the training challenges SB 602 had created. They ultimately worked with the American National Standards Institute (ANSI) to develop a version of their ASTM 2659 accreditation specifically for food handler training. The amendment bill to SB 602, SB 303, passed the legislature and was signed into law on September 6, 2011. By this time however, the NRA had used its direct restaurant database and industry connections to successfully capture millions of dollars in revenue. Important things to note about SB 602 and 303: All counties where the health department had an existing program were excluded from the bill. Additionally, hospitals, daycare facilities, nursing home facilities, and schools (all serving highly susceptible populations) were exempted from the training requirement—as were unions! So it would seem the real reason the NRA promoted the bill was to capture revenue, since so many exemptions significantly minimize the opportunity to improve food safety in California. The story does not end there. In 2012, the NRA, in conjunction with the Utah Restaurant Association (URA), introduced through Representative Anderson UT House Bill 313 (HB 313) to the Utah Legislature. This bill was designed to enable Federal and State laws to supersede all local health department control of existing food handler training programs. Removing local control from health departments was in the best interest of the NRA because they did not want to comply with local regulation. For this reason they made every effort to eliminate local regulatory control in favor of their national food handler program, effectively attempting to replace the longest running food safety program in the country (operating since 1984). In fact, during a committee meeting for HB 313, the URA president was asked how local health departments would maintain food safety programs, which include inspections, if the local health departments no longer received food handler training monies (a likely result of the NRA's HB 313). She replied "The health departments will just need to raise the fees on the restaurants" (their own representatives). The bill did not pass. Arizona HB 2436 may be a slightly different set of circumstances, but the NRA's desired outcome is the same. Like in Utah, many local Arizona health departments have had food safety training programs in place for many years and have been able to modify these programs to meet the needs of their public. HB 2436 now makes it more difficult for health departments to modify the training program to address local needs or concerns. Unlike the California bill, existing programs were not excluded from the new regulation. What is the origin of AZ HB 2436? Is it related to the NRA or the Arizona Restaurant Association (ARA)? Finding these answers has taken some effort, but I have followed the money and discovered how this bill passed the Arizona Legislature. We must start with Steve Chucric who is the President and CEO of the ARA. In 2012, Mr. Chucric was elected to the Maricopa County Board of Supervisors (representing 683,885 residents) where nearly 10% of his campaign funds were donated by the NRA and its employees or representatives. In June of 2013, through a competitive RFP process, the ARA was unsuccessful in winning a contract with Maricopa County Environmental Services to provide food safety training to food workers in the county. Shortly after the ARA's defeat, Mr. Chucric had a meeting with Representative Shope (65,450 residents) where he asked the representative to sponsor what eventually became HB 2436. Mr. Chucric was a strong proponent of the bill and influential in its passing. Some of the circumstances surrounding Mr. Chucric's influence of HB 2436 are unclear; however, I find it very suspicious that this bill directly impacts the ARA's bottom line

and the bonuses received by Mr. Chucri. I say the fox is loose in the chicken coop. The common thread between these pieces of legislation (CA SB 602, UT HB 313, and AZ HB 2436) is not an effort to promote food safety, nor is it an effort to provide local health departments with the resources and control needed to deal with local problems and outbreaks. None of these bills was introduced to mitigate food safety challenges through increased regulation or inspection. The common thread for these bills—each sponsored by the NRA or its state chapter—is to increase revenue for the National Restaurant Association. I encourage all those who are influential with respect to the upcoming changes in rule to do what is best for the public health of county residents. In my opinion, that means writing the rule in a way that gives local officials control of their food handler programs to the greatest extent of the law.

**Comments:**

I cannot believe the Board of Supervisors did not oppose this law when they had a chance. They just let the fox loose in the chicken coop.

**Comments:**

I feel the county needs a database of food workers for epidemiology purposes.

**Comments:**

This rule lowers the quality of Maricopa s program by allowing programs designed at a lower quality. The County would also have to accept cards from counties on a different food code version.

Dear Richard Hill:

Thank you for your letter regarding the recently enacted A.R.S. § 11.269.12. (“New Rule”) that pertains to Maricopa County Environmental Health Code (MCEHC) Chapter VII.

We acknowledge your concerns to the Maricopa County Enhanced Regulatory Outreach Program (EROP) case ES-2014-003/Food Service Worker Certification. According to the EROP process this correspondence has been added into the case staff report, which can be found at <https://www.maricopa.gov/regulations/es/pdf/meetings/102714staff.pdf>.

We appreciate your participation in Maricopa County Environmental Services Department’s efforts to develop regulations and we welcome comments through the [EROP process](#).

**RE: Contract with StateFoodSafety.com (Serial 12149-RFP)**

Dear Gentlemen:

We represent StateFoodSafety.com and Above Training Inc. (collectively "SFS") in its legal matters. We understand that Maricopa County, specifically the Maricopa County Board of Health, Environmental Services Department is considering revising the MCBHC Chapter VIII to align with the recently enacted A.R.S. Section 11-269.12 ("New Rule"). This change would enable any food employees or food service workers (collectively "food service workers") to satisfy food service workers training requirements by obtaining a training course meeting Arizona state requirements, regardless of where and by whom such training was provided.

We further understand that this administrative change is scheduled to take effect on or about January 21, 2015.

Our client has a contract with Maricopa County (the "County"), for a term of three years, beginning June 1, 2013 and ending June 1, 2016 ("Contract") which was obtained under normal RFP procedures and enables SFS to exclusively train food service workers in the County for the term of the Contract. The New Rule described above would substantially impair the Contract by allowing food service workers to obtain a valid certificate from any training course in Arizona that meets Arizona requirements.

Because of the exclusive nature of the Contract, SFS has invested substantial time and funds to provide excellent training and to fulfill the terms of the Contract. Since June 1, 2013, it has trained and certified 147,710 food service workers. It has the manpower and equipment necessary to continue to fulfill its responsibilities under the Contract and to train all additional food service workers in the County over the remainder of the Contract.

The New Rule would substantially damage our client and substantially diminish the revenues that would otherwise be expected under the Contract. If training and certification anywhere in Arizona would be accepted in the County, it is expected that our client's training of food service workers would be reduced by 91% percent.

Furthermore, implementation of the New Rule would not be in the best interests of the public. The County has carefully regulated and approved the training that SFS is providing. However, the County has no right or ability to be able to regulate and approve training from other areas of Arizona. Implementation of the New Rule would allow many food service workers to be certified in the County without undergoing the training that has been set up by SFS under the control and purview of the County.

In addition, implementation of the New Rule before expiration of the Contract would be in violation of the law. The US Constitution and the Arizona State Constitution both forbid the passage of laws that impair contractual rights. See the Contract Clause of the US Constitution, Article I, Section 10, clause 1. "No State shall enter into any . . . Law impairing the Obligation of Contracts . . ." See also Arizona Constitution, Art. 2, Sec. 25 "No bill of attainder, ex-post-facto law, or law impairing the obligation of a contract, shall ever be enacted." Under U.S. and Arizona Constitutions, the courts will not apply laws or regulations that substantially impair an existing contract, unless there is a compelling public policy reason.

The U.S. Supreme Court has held that the courts should apply even greater scrutiny in situations where a statute impairs contractual obligations of a governmental entity. See *United States Trust Co. v. New Jersey*, 431 U.S.1 (1977). Arizona state and federal cases have recognized and applied the contract impairment rule. See, e.g. *Pure Wafer, Inc. v. City of Prescott*, 2014 WL 1515143 (D.C. Arizona 2014). Cases in the Ninth Federal Circuit, in which Arizona is located, have held that governmental regulations and laws that impair existing contracts are in violation of federal and state constitutional provisions. See, e.g. *Associated Builders & Contractors v. Baca*; *Chamber of Commerce of the United States v. Bragdon*, 769 F. Supp. (N.D. Cal. 1991). Cases in other federal jurisdictions have also reached similar holdings regarding contractual impairment. See, e.g. *Salt Lake County v. Holliday Water Company*, 234 P.3d 1105 (S.C. Utah 2013); *Association Of Surrogates And Supreme Court Reporters et al v. State of New York*, 940 F.2d 766 (2<sup>nd</sup> Cir. 1991)

Accordingly, it would not be advisable for the County to violate constitutional provisions and proceed contrary to established case law. Rather, we would suggest that the County modify its New Rule to take effect after the existing Contract expires on June 1, 2016. This would be an easy alteration of the New Rule which would enable the County to meet its obligations under the contract and to comply with the law. It would be in the best interests of the County and the public in general, as discussed above.

Maricopa County  
October 18, 2014  
Page 3

We urge the County to take the action recommended above. Please consider this recommendation carefully and respond to me no later than October 23, 2014.

Sincerely,

DURHAM JONES & PINEGAR, P.C.

Richard L. Hill

Tim,

It was good speaking with you today. I'll look forward to speaking with the members of the Arizona Food Marketing Alliance in November. This will be a good opportunity to discuss and answer questions related to the Maricopa County Enhanced Regulatory Outreach Program (EROP) case ES-2014-003/Food Service Worker Certification. I think a better understanding the case will improve AFMA and its members' ability to provide feedback on the case via the EROP process.

I will come prepared to provide updates on implementation of the Ad Hoc Taskforce's recommendations and the Cutting Edge Program as well.

Thank you,

**Andrew Linton, CPM, R.S.**

Andy-

Can you help me understand the reason for doing away with the Food Handler cards?  
We are having questions about it.

Also, being that we are in the commentary process of the potential changes would this be a good opportunity to get all my folks here at a meeting that you could review this with them and answer questions?

Thanks,

Tim

Hello Tim,

I wanted to provide you with the draft language and presentation we gave to stakeholders for Maricopa County Enhanced Regulatory Outreach Program (EROP) case ES-2014/Food Service Worker Certification. The reason for initiating this EROP case is to bring our requirements into alignment with A.R.S. § 11.269.12 Food Handler training and Certification, which went into effect on 7/31/14. If you have any question or if I can provide further clarification, please let me know.

This information will also be available on the EROP website on Monday, 10/13. <http://www.maricopa.gov/regulations/es/process.aspx>

Thank you,

**Andrew Linton, CPM, R.S.**

Dear David Ludwig:

Thank you for registering your comment regarding Maricopa County Enhanced Regulatory Outreach Program (EROP) case ES-2014-003/Food Service Worker Certification via the [EROP](#) website.

Code language to initiate case ES-2014-003/Food Service Worker Certification will be provided to the Board of Health (BOH) at their October 27, 2014 meeting. This language is contained in the [staff report](#), which is now posted on the EROP website. Also, case ES-2014-003/Food Service Worker Certification is scheduled for an additional follow-up stakeholder meeting and a BOH meeting in January 2015.

We appreciate your participation in the Maricopa County Environmental Services Department's efforts to develop regulations that serve our community and ensure a safe and healthy environment.

**Comments:**

In your second stakeholder meeting briefing you show the food code changes. In all other documents there is just an overview. What I would respectfully request is the code language that will be provided to the Board of Health for approval. I am looking for the exact verbiage and not an overview statement. I cannot find this on any of the websites and when it states for more information it simply loops you back to the 10 step process. Also look at your briefing statements they show stakeholder meeting after the Board of Health meeting, is this true?
